Convert SDMX to Excel

Statistics Department
Central Bank of the Republic of Kosovo

January 2019
What is SDMX?

Statistical Data and Metadata eXchange (SDMX) is an ISO standard, designed to describe statistical data and metadata, normalise their exchange, and improve their efficient sharing across statistical and similar organisations.

The SDMX sponsoring institutions are: the BIS, the ECB, the Eurostat, the IMF, the OECD, the United Nations and the World Bank.

Statistical datasets (files) are converted from different forms into SDMX format. For example, from Excel to SDMX.

SDMX files can be reconverted to Excel, CSV, and other formats.

SDMX files can also be automatically communicated machine to machine.

For more info on SDMX: 
How to convert SDMX files to Excel?

Step 1: Enter ‘IMF’s SDMX Central’
https://sdmxcentral.imf.org/

Step 1: Select ‘Convert’
How to convert SDMX files to Excel?
