EXPLANATORY NOTES	53

EDITORIAL

Banking and Payments Authority of Kosovo is continuing an effort in providing to the public information on the main developments in the financial and other sectors on a monthly basis. A significant progress has been made in improving financial sector statistics, especially related to the banking sector and beyond traditional monetary statistics aiming other financial corporations in order to have a consolidated picture on financial developments in Kosovo. In addition, at latest by the end of Q3 2006, the BPK will publish for the first time Balance of Payments Bulletin (initially on a yearly basis). This would enhance the statistical coverage and narrow the existing information gap regarding the developments in Kosovo economy.

This issue, as previous ones, assesses the main developments on a quarterly basis. A greater emphasis has been put on developments in the financial sector and some attention is paid to other sectors as well. However, lack of quarterly data on sectors other than financial (especially real and external) is the main obstacle in making more detailed and comprehensive assessment.

Since the Kosovo represents euroized economy, and the main trading partners are members of the European Union (EU), we devoted some attention to the main economic developments in the euro area. The remainder of the assessment contains quarterly analysis of the financial sector from the survey perspective, followed by developments in the commercial banking sector and finalized by some developments in the fiscal, real and external sector.

EURO AREA¹

On June 2006, the Governing Council of ECB decided to raise the minimum bid rate of the main refinancing operations of the Euro system by 25 basis points (bp), to 2.70%. As a result of the expectation of this rise, the interest rates of both: money market and MFI loans and deposits showed increase during Q2 2006. In April 2006 interest rates on deposits from households increased by around 4bp, reaching 2.32% on average. The highest increase was shown by the interest rates on deposits from non-financial corporations with maturity of over two years (by 36bp), reaching 3.7%. The 10-year bond yield stood at 4.0% in the end of Q2 2006, 30bp more than in Q1 2006. Similar occurred to the three-month money market interest rate, which rate was 3.0% at end Q2 2006.

The Harmonized Index of Consumer Prices (HICP) inflation increased to 2.5% in June (Eurostat flash estimate) from 2.2% in March 2006. The leading contributors to the HICP inflation rate were fuels for transport with the 0.46 percentage points (pp), followed by gas (0.20pp) and heating oil (0.19pp), whereas telecommunications (-0.18pp) and garments (-0.13pp) had the biggest downward impacts. The core inflation rate (HICP excluding energy and unprocessed food) has fluctuated around 1.5% till May 2006. The second quarter of 2006 started with high oil prices, around 75 USD per barrel, and continued with this ongoing strong demand with the price of 74 USD per barrel by the beginning of July.

In the first quarter of 2006 the Gross Domestic Product (GDP) increased by 0.6% and 1.9% compared to Q4 2005 and to same period last year, respectively. The main contributor to this quarterly growth was private consumption with 0.4pp, followed by the equal contribution of gross fixed capital formation (0.1pp) and government consumption (0.1pp). The contributing order was same in annual basis as well: private consumption (1.0pp), gross capital formation (0.6pp) and government consumption (0.4pp).

In April 2006 the trade balance for the euro area showed deficit of euro 0.8 billion, whereas the seasonally adjusted current account (CA) demonstrated a balance, reflected by surpluses in goods (euro 0.8 billion), services (euro 3.0 billion) and income (euro 2.3 billion), which were offset by a deficit in current transfers (euro 6.2 billion). At the end of Q2 2006 the exchange rate USD/EUR appreciated compared to March 2006, reaching the rate of 1.27.

¹ The description of the recent developments in euro area is based on ECB Monthly Bulletin 07/2006. Some indicators for the second quarter of 2006 are not yet released, while the data for the external sector and interest rates (on loans and deposits) are only available as of April 2006.

FINANCIAL SECTOR

In Q2 2006, deposits at financial corporations stood at euro 853.8 million, representing almost same growth (1.1%) as in Q1 2006 (1.2%). Households, representing 57.1% of deposits in Q2 2006, supported the growth of deposits with 1.1pp, followed from other nonfinancial corporations (1.1pp). This positive support is offset from negative contribution of the public nonfinancial corporations (2.1pp).

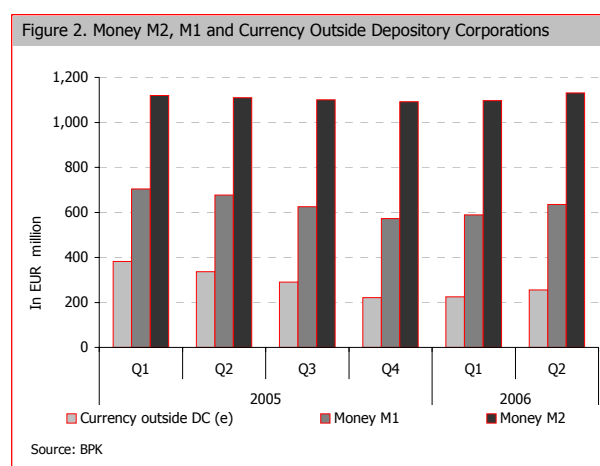

Regarding the demand side of the financial corporations, domestic claims in Q2 2006 decreased to euro 249.6 million from euro 323.1 million in the previous quarter. As in the Q1 2006, the decline came due to the faster increase in liabilities to the central government, rather than increase in the claims to the real sector. Actually, liabilities to the central government are comprised from government balances at BPK and revenues collected through privatization process, at the same time being the driving item. In cumulative basis, revenues from privatization in Q2 2006 stood at euro 250.5 million compared with euro 51.1 million in the same period of 2005. The source of increase in the privatization revenues might be partially attributed to the international incoming transfers and bank financing (loans). Being the significant source for privatization, the bank loans (claims on the real sector) in Q2 2006 grew with 32.5% in annual basis, or 11.4% accelerating from 8.1% in Q1 2006.

The increase in the government deposits at BPK, made a sufficient source for growth in Net Foreign Assets (NFA), too. Actually, financial corporations NFA in Q2 2006 increased to euro 833.4 million, a 12.0% increase against 9.0% in previous quarter (figure 1). Dominated from deposits and securities other than shares (90.8% of claims), claims on nonresidents in Q2 2006 amounted to euro 905.5 million against euro 815.8 million in Q1 2006.

Amounting to euro 1.131 million in Q2 2006, broad money increased with 3.1% against the increase with

0.5% in Q1 2006. In this scenario, currency outside depository corporations contributed positively (2.7pp) same as transferable deposits (1.5pp). On the other hand, other deposits contributed negatively with -1.0pp. Worth mentioning is that within the structure of other deposits all items represented decline, except households showing slight increase.

Developments in the banking sector – Banking sector in Kosovo consists of 6 commercial banks operating with 214 banking units as of June 2006. At the same time number of their employees approaches 2289. Ratio banking units/employee remains very stable – similar to previous years – shifting only for one or two employees per banking unit.

Additionally, the liquidation process of the Banka Kreditore e Prishtinës² – is successfully being carried out with about 89.45% of all BKP depositors being entirely refunded, up to the end of Q2 2006.

Clients' deposits by the end of Q2 2006 composed about 83.0% of the total ODC liabilities, reaching the amount of euro 874.8 million. The households remain to be the reliable source for the banks' liabilities, composing the 55.7% of total ODCs' deposits as of Q2 2006. Much more, the quarterly growth of the total deposits (2.16%) was exclusively contributed by the household deposits (2.16pp).

Other deposits experienced a very slight decrease (by 1.1%) due to the non-financial corporations (NFCs) during Q2 2006. Yet, they do make about 60.6% of the total deposits. On the other hand transferable deposits increased by 7.6% over previous quarter, amounting at euro 334.5 million.

² Balance sheet of BKP is not excluded from the statistics. The last BKP balance sheet data are as of 22nd of May 2006. (BKP is in liquidation process since 17th of March 2006)

Deposits with maturity over 3 months and up to 1 year continually are maintaining the highest share to the total deposits, by making 28.4% of total deposits at end Q2 2006, even though compared to Q1 2006 and Q2 2005 these deposits decreased slightly by 1.3% and 1.1%, respectively. Of an interest is the positive growth of the deposits with over 1 year maturity, composing 11.2% of the total deposits from only 3.1% at the same time last year.

With a rise of 2.6% compared to Q1 2006, the total ODC assets amounted euro 1,055 million at the end of Q2 2006. Loans (euro 617.6 million) as the main component of the banking assets showed increase in their share to total assets up to 58.5% (4.5pp more than in Q1 2006). Regarding foreign claims, composed from deposits in banks abroad and investments in securities, in Q2 2006 stood at euro 263.2 million, over euro 303.1 million in Q1 2006. Consequently the ratio of foreign claims to total assets dropped during Q2 2006, standing at 24.9% from 29.5% at Q1 2006 and 28.9% at Q2 2005. This indicates that the composition in balance sheet has shifted towards the credit of domestic economy.

Although the deposits from households compose the most of banks deposits, the banks' loans are mostly granted to non-financial corporations (about 77.9% of total loans). Moreover, the maturity structure of the loans stands in opposite of that of the deposits. The loans with maturity of over 2 years make up almost 50.0% of total loans from 46.8% in Q1 2006, while the two other categories up to 1 year and over 1 year and up to 2 years share almost equally the remaining percentage. This improvement towards longer maturities is more noticeable compared in year-to-year basis, when in Q2 2005 the loans were almost equally concentrated between all three different maturities.

Regarding the industry which benefits most from the ODC loans there was no change with the previous years trend. The services sector hold the top place, by accumulating the 76.5% of total loans granted to non-financial corporations. And that, mostly services related to trading activity, with the amount of euro 310.5

million. The lowest beneficiary remains agricultural sector taking only 3.4% of total loans granted to industry in general. But, positive sign is the fact that the amount of loans granted to agriculture increased by 17.0% and 36.5% compared to Q1 2006 and Q2 2005, respectively.

At the same time, parallel with the ODCs, about 8.3% of total FC loans were managed by **Other Financial Intermediaries**. This percentage share is decreasing constantly during 2006, mainly due to the fact that the total ODC loans are growing faster (by 11.1%) than OFI loans (by 4.4%), in particular. OFI loans amount at around euro 55.8 million, or 32,613 OFI loans, which were mainly granted to the other non-financial corporations.

Deposit/loan interest rate spread maintains the wideness of the previous quarters. No extensive changes in Q2 2006 with respect to interest rates range. Household deposits show on average slightly higher interest rates (2.63%) than non-financial corporations deposits (2.35%). Additionally, interest rates on loans decreased slightly for both, loans granted to households (by 0.2pp, on average) and to non-financial corporations (by 0.7pp, on average).

FISCAL SECTOR

As interim report of the Treasury shows Kosovo Consolidated Budget (KCB) in Q2 2006 faced a surplus of euro 77 million. Even in the same period of the last year KCB recorded a surplus (cumulative basis) but, sizeable lower (euro 32 million). In this situation, contributors are both, increase in the revenues and decrease in the expenditures.

As presented in the figure 4, revenues in Q2 2006 totaled euro 328.8 million, euro 20 million higher over Q2 2005. As contrary to the previous years, when increase in the revenue came mainly due to the increase in the border taxes, in 2005 increase in the tax revenues is supported only from domestic taxes (mainly VAT). Thus, in Q2 2006 the share of domestic taxes to

tax revenues shows increase to 31.3%, from 24.6%, while tax revenues represents dominant item of total revenues (87.2% in Q2 2006).

Expenditures in Q2 2006 amounted to euro 251.7 million, which compared with Q2 2005 are lower by euro 24.8 million. 'Goods and services' and 'wage and salaries' represent broadly stable trend (slight increase), while other categories show decline with euro 28.8 million. Sharpest decline is recorded in the category of capital outlays for euro 19.2 million.

Privatization. During the second quarter of 2006 the KTA announced bid results for 3 more waves (13th, 14th and 15th) with 57 new companies to be privatized. This number is similar to previous quarter (58), but the sum to be accumulated from these privatized companies is three times lower than in Q1, around euro 27.4 million (see figure 5). This might be as a result of the smaller companies being privatized through Q2 2006, as well as because only 3 of them are to be privatized through special spin-off (having in mind that the special spin-off is usually used for the specific, more prospective companies).

Consequently, in the first half of 2006, the privatization process in general shows very positive trend in both, number of companies to be privatized (around 113 NewCos in total) and amount to be accumulated from them (about euro 112.3 million). These figures indicate a faster movement of the process compared to last year (156 companies and around euro 156.9 million, respectively, at end-2005). In addition to bid results announced, two more waves (16th and 17th) were also launched during Q2 2006.

REAL SECTOR

In June 2006 the annual growth rate of **inflation** (CPI measured) decreased to 2.6%, from 2.8% in May 2006. Increase in the prices of vegetables (21.3%) and transport equipment (15.5%), fuel prices, kept inflation level above 2%. Having into consideration the weight of food prices in CPI, increase in the vegetables

contributed with 1.4pp the overall price level. In addition to that, transport prices supported the increase in prices with 0.8pp.

As figure 6 shows, regarding monthly CPI, there is different path in comparison with annual flows. Namely, in June 2006 the prices stood at the level of -0.6%, 0.2pp lower than in previous month, which further decline can be mainly attributed to the vegetables. The vegetables produced negative contribution by 0.9pp.

EXTERNAL SECTOR

Kosovo trade deficit for Q2 2006 recorded euro 534.1 million over euro 519.6 million in the same period of the previous year. As can be recognized from figure 7, there is increase in exports and imports as well. Due to the fact that imports grew with euro 30 million, and exports with euro 15.5 million there is a deterioration of the trade balance for around euro 15 million.

Concerning the structure of exports, mineral products recorded a robust increase from 4.4% of exports in Q2 2005 to 15.1% in Q2 2006. Even showing sluggish increase, vegetable products increased their share to total exports to 3.5% of exports from 2.1%. Still the main component of Kosovo exports is base metals and

related, with the share of 53.7% of total exports, as of Q2 2006. Imports side shows that mineral products, item with the highest share in total imports, shows further increase regarding the share to imports to 21.6% from 16.4% in Q2 2005. Increase is recorded also in investment goods. Actually, machinery, appliances and related increased their share to 11.9% (+1.5pp).

In Q2 2006, exports to EU as share to total exports declined to 32.2% from 37.2% in Q2 2005. The decrease came mainly due to the decline in exports to Greece (5.5% in Q2 2006 against 11.8% in Q2 2005). The decline is recorded as regards to other EU countries as well on average by 1pp. Slovenia is the country to which Kosovo exports increased considerably (6.8% from 2.1%). Regarding the non-EU countries, the biggest increase is recorded to Swiss (8.4% from 0.5% in Q2 2005).

Imports from European Union (EU) decreased to 32.5% from 36.1%. The decrease is mainly due to the decrease in imports from Germany for by 3.8pp. To some extent, the decrease in imports from EU is offset from the increase in imports from FYROM and Serbia and Montenegro. Actually, imports from FYROM in Q2 2006 accounted for 18.6% from 17.2%, while those from Serbia and Montenegro increased also to 14.5% from 13.0%.

EXPLANATORY NOTES

TABLES 2-14: FINANCIAL SURVEY AND BALANCE SHEETS FOR THE FINANCIAL SECTOR

The *financial surveys*, inspired on the IMF-Manual on Monetary and Financial Statistics, are a subset of the financial accounts in the SNA 1993 and are based mainly on *balance sheets*, which are also published.

Sources:

BPK: Accounting system; *Other depository corporations* (these are commercial banks): monthly Statistical Bank Report (SBR) based on BPK-Amended Rule XI on Reports by the banks (Form Nr. 11); *Insurance companies*: Aggregated data from reporting scheme to the Insurance Supervision Department of BPK; *Pension Funds and Other financial institutions*: aggregated data from reporting to the Pension Supervision Department and Banking Supervision Department of BPK.

Classifications:

Institutional sectors (SNA 1993 compatible). The economy is composed of economic units, which may be defined as economic entities that are capable, in their own right, of owning assets, incurring liabilities and engaging in economic activities and in transactions with other entities. The institutional sectors group similar kinds of institutional units. BPK has used the scheme presented below.

<p>A. Domestic economy</p> <p><i>Non-financial corporations</i> Public non-financial corporations Other non-financial corporations</p> <p><i>Financial Corporations</i> Central bank Other depository corporations Other financial corporations <i>Insurance companies</i> <i>Pension funds</i> <i>Financial auxiliaries</i> <i>Other financial institutions</i></p> <p><i>General Government</i> Central government Local government Social security funds</p> <p><i>Households</i> <i>Non-profit institutions serving households</i></p> <p>B. Rest of the world.</p>
--

The **financial corporations** sector consists of all resident corporations or quasi-corporations principally engaged in financial intermediation or in auxiliary financial activities, which are closely related to financial intermediation.

The Banking and Payments Authority of Kosovo (BPK) complies not entirely with the definition of a monetary authority, as it issues no banknotes. In the financial surveys the "*BPK*" is mentioned instead of 'central bank'.

Other depository corporations (ODC): In Kosovo these are the commercial banks licensed in Kosovo, numbering actually 7 institutions.

Other financial intermediaries (OFI) consist of all resident corporations engaged in financial intermediation except depository corporations, insurance corporations and pension funds (cf infra). In the financial surveys on Kosovo, this sub-sector is composed entirely by the 'Micro Finance Institutions' and the 'Other non-bank

financial institutions'. These financial institutions are engaged in lending to small scale business and individuals, mainly in rural areas and the funding is provided mainly by donors.

Insurance companies (IC) consist of incorporated, mutual and other entities whose principal function is to provide life, accident, sickness, fire or other forms of insurance to individual institutional units or groups of units.

Pension Funds (PF) are established for purposes of providing benefits on retirement for specific groups of employees and consist of:

- *Individual Savings Pension managed by KPST complemented with additional voluntary contributions paid by the employer or the employee, or both;*
- Supplementary Employers Pensions, provided to employees by their employer;
- Supplementary Individual Pensions, provided to natural persons from licensed pension provider.

Financial auxiliaries. In Kosovo this sub-sector comprise the exchange offices and money transfer services. As their contribution to the outstanding amounts of deposits with the other financial institutions in Kosovo is limited, their position is, in contrast to the financial sub-sectors mentioned before, not presented separately in the final surveys.

Remarks: Due to the lack of an operational enterprise register, the reporting agents do allocate the unincorporated business to the sector of the non-financial corporations. This leads to a blurred distinction between households and non-financial corporations in the statistics. *Non-profit institutions serving households (NPISH)* comprise religious societies and social, cultural, recreational and sports clubs, charities, relief and aid organizations financed by voluntary transfers in cash or in kind from other institutional units.

Financial instruments (SNA 1993 compatible)

The SNA 1993 classifies also financial instruments into groups of instruments with similar characteristics. The most important in the current context are briefly described.

Currency and deposits consist of *Currency* comprises those notes and coins in circulation; *Transferable deposits* comprise all deposits that are exchangeable on demand at par, , freely transferable by check; *Other deposits* include all claims, other than transferable deposits, on the central bank, other depository institutions. Typical forms of deposits are non-transferable savings deposits and term deposits. Within the framework of the definition of money aggregates a further distinction according the original maturity has been made.

Securities other than shares include bills, bonds, certificates of deposit, commercial paper traded in the financial markets. These kind of financial assets do not yet appear on the liability side of the financial sector in Kosovo.

Loans include all financial assets that are created when creditors lend funds directly to debtors and evidenced by non-negotiable documents.

Shares and other equity comprise all instruments and records acknowledging, after the claims of all creditors have been met, claims to the residual value of corporations.

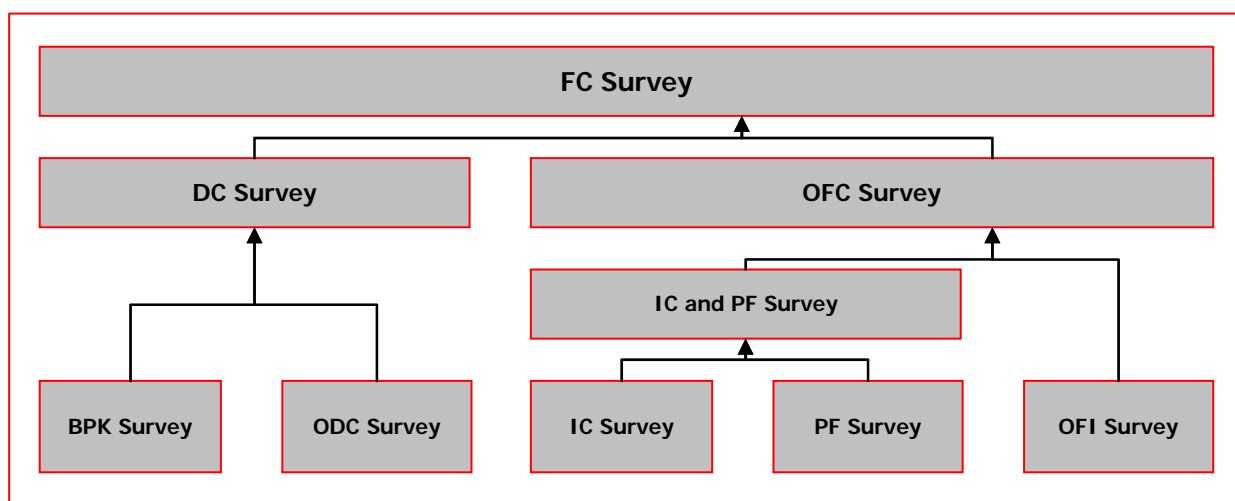

Insurance technical reserves are subdivided in *Net equity of households in life insurance reserves and pension funds.* Life insurance reserves are considered assets of the insured persons or households and pension funds consist of the reserves held by funds established by employers and/or employees to provide pensions for employees after retirement; *Prepayments of premiums and reserves against outstanding claims.* Insurance premiums are due to be paid at the start of the period covered by the insurance, and this period does not normally coincide with the accounting period itself. Therefore parts of the insurance premiums payable during the accounting period are intended to cover risks in the subsequent period;

Reserves against outstanding claims are reserves that insurance enterprises hold in order to cover the amounts they expect to pay out in respect of claims that are not yet settled or claims that may be disputed.

Other accounts receivable/payable, mainly consist of accounts receivable and payable, other than those described previously value of corporations.

Definition(s) and Methodological notes:

The bilateral positions of the individual institutions are netted out and subsequently the bilateral positions between the sub-sectors at different stages are netted out leading to a **consolidated position** of the entities considered. This differs substantially from a simple aggregation. The consolidation is complete as far as it concerns the traditional financial instruments. The data available do not permit for an adequate consolidation of the accruals and most of the other payables/receivables for which the data reported by individual financial institutions does not contain a breakdown of the counterparts by institutional sub-sector. For the consolidation the following sequence is applied.

- FC Financial Corporations;
- DC Depository Corporations;
- BPK Banking and Payments Authority of Kosovo;
- ODC Other Depository Corporations;
- OFC Other Financial Corporations;
- OFI Other Financial Intermediaries;
- IC Insurance Companies;
- PF Pension Funds;

The surveys of the sector and the sub-sectors are presented according to a common framework:

Net foreign assets (+/-)
Claims by instrument
Liabilities by instrument
Domestic claims
Net claims on government sector
Claims on other sub-sectors
Instrument
Counterpart (institutional sector)
Domestic liabilities
Claims on other sub-sectors
Instrument
Counterpart (institutional sector)
Shares and other equity
Other items (+/-), including consolidation adjustment

The **counterpart** is defined as the institutional sector on which the holder of an instrument has a claim. In case of a term deposit by a non-financial corporation with a commercial bank, the corporation has a claim on the commercial bank. In case of a security, the holder has a claim on the issuer of the security (for instance a corporation who issued shares), regardless from whom it was bought. Along the same lines of reasoning, a

holder of a currency note has a claim on the issuer, namely a central bank. In the special case of Kosovo, this implies that holders of euro-currency notes do have a foreign claim and enters in the foreign assets.

The *residency* criteria set forward by the SNA 1993 can not be followed in all details, as the residency /non-residency dichotomy is mainly based on address information in the files of the reporting institution. The country indicated in those files does not necessarily correspond with the country where the client has its main center of economic interest.

The *valuation* of the financial instruments follows the market value for securities and the nominal value for deposits and loan, which are not adjusted for possible provisions made by the creditor. The financial instruments in foreign currencies, other than euro, are converted against the euro exchange rate prevailing at the end of the reporting period.

The surveys on BPK, "Other depository corporations" and 'Depository corporations' are established at monthly *frequency*, while those on "Other financial intermediaries", "Insurance companies", "Pension funds" and "Financial corporations" are available at a quarter frequency. The data published are not adjusted for eventual seasonal effects.

Remarks: *The data on the Supplementary Individual Savings Pension schemes managed by KPST are not yet made available by KPST. The data structure on Other Financial Institutions is based on their annual accounts structure.*

The *Monetary aggregates* are an integral part of the surveys and are defined as:

Currency in circulation

M0

Transferable deposits [1]

M1 = M0 + [1]

Other deposits with original maturity up to 2 years [2]

Broad money = M1 + [2]

Under the old money definitions, due to lack of data, only currency in circulation and deposits, regardless the maturity, in euro and other currency, held by the non financial sector and the households were considered. Now the money-holding sector is defined in accordance with international standards comprising all domestic sectors except the depository corporations and the central government. At the same time only deposits with an original maturity of 2 years or less belong to the money boundary. This double change in definition makes it impossible to reconstitute coherent back data.

Due to different constraints the estimation of currency in circulation for Kosovo is even more difficult than in other economies and an estimate of the amount of currency in circulation has to rely on hypotheses based on macroeconomic behavior. As a *principle* the annual growth of the broad liquidity in the economy is taken as the reference. Broad liquidity is defined as broad money, of which only deposits can be observed directly. The currency in circulation will be a function of the amount of the deposits, as they form the complement within broad money.

Additional information: see Monthly Statistics Bulletin, BPK, November 2004.

TABLE 19: EFFECTIVE INTEREST RATES APPLIED BY COMMERCIAL BANKS

Source: BPK-survey 'Interest Rate Report' among all commercial banks licensed in Kosovo.

Definitions and nature of the data collected: The main features are listed here below:

1. Reporting institutions	All commercial banks licensed in Kosovo
2. Financial instruments	Loans Deposits
3. Currency denomination	EUR only
4. Frequency	Monthly
5. Counterparts	All domestic non financial corporations; All domestic households
6. Reported contracts	New business during the reference month / outstanding amount (depending on the type of financial instrument, cf. infra)
7. Type of interest rates	Annual interest rate not including any fees nor commissions
8. Method of calculation	Annual agreed rate or Actuarial rate (depending on features of the specific contract, cf. infra)
9. Reported rate and volume	<ul style="list-style-type: none"> - One interest rate by category averaged with the weights of the new business of the reference month or outstanding amounts (depending on the type of financial instrument - cf. infra) and; - the total new business volume or outstanding amounts (depending on the type of financial instrument - cf. infra). <p>A category is defined by 5 variables and forms the combination of:</p> <ul style="list-style-type: none"> - the type of financial instrument; - the sector allocation of the counterpart; - the maturity band and; - the range of amount involved; - the purpose of financing in the case of loans

The annual rate to be reported by the commercial banks is the annual agreed rate (AAgR) or the annual actuarial rate (AAcR).

The *Annual Agreed Rate* (AAgR) is to be reported in all cases where there is no capitalization or the capitalization follows a regular pattern or the interest is charged on the remaining outstanding capital and no grace periods for interest payments or capital redemption are granted.

In all other cases the *Annual Actuarial Rate* (AAcR) has to be reported. This is the annual interest rate equaling the discounted (actualized) future cash inflows to the nominal amount of the loan or deposit.

The interest rate communicated by the commercial banks takes account of the interest rate on all individual transactions during the reference period, with 2 two exceptions : for saving deposits and current accounts, the interest is calculated by the bank as:

- the interest rate on each outstanding contract at the end of the reference month, weighted with the outstanding amount of the contract at the end of the reference period, or;
- the cumulative interest flows (accrued interest) over the month divided by the average of the daily outstanding amounts.

IRR-statistics: a simple arithmetic average of interest rates communicated by banks completed with the standardized variance as a measure of the distribution around the calculated simple.

Additional information: see Monthly Statistics Bulletin, BPK, November 2004.

TABLE 21: INTERBANK CLEARING SYSTEM

The Interbank Clearing System (ICS) is established, regulated and managed by the BPK. It started with operation in May 2001. The ICS is an electronic clearing and settlement service for payment orders among banks and the BPK, and with the BPK as an agent of the PISG (Ministry of Finance and Economy) of Kosovo. It offers end of day net settlement on accounts at the BPK for single orders and/or bulk paper listings of multiple orders such as mass salary payments. The service permits the exchange of electronic data delivered via telephone lines to the BPK electronic clearinghouse. Currently there are seven commercial banks participating at the ICS, and BPK itself, which acts as a fiscal agent for the Ministry of Finance and Economy. ICS operates based on Operating Rules for Electronic Interbank Clearing and Settlement Service (EICS) of the BPK.

TABLE 22: FOREIGN TRANSFERS

OUTGOING: The movement of money from account of bank or other financial corporation within Kosovo to the account in bank or other financial corporation accounts outside Kosovo.

INCOMING: The movement of money from an nonresident bank or other financial corporation account in the bank or financial corporation account within Kosovo.

WIRE TRANSFERS AGENCIES: All non-bank financial institutions performing electronic or wire transfer services (Union financiar Prishtina, Western Union PCB, Western Union RZB, Monedha).

TABLE 27: FISCAL SECTOR

PAYMENTS TO HOUSEHOLDS: Starting from 2002, payments to households are included within subsidies and transfers.

RESERVES: Reserves include amounts authorized for contingent expenditures that may be used only for urgent and unforeseen requirements.

TABLES 31-33: EXPORTS AND IMPORTS

Harmonized System Coding System used in the presentation of external trade statistics by commodity group:

- I Live animals; animal products;
- II Vegetable products;
- III Animal or vegetable fats and oils and their cleavage products; prepared edible fats; animal or vegetable waxes;
- IV Prepared foodstuffs; beverages, spirits and vinegar; tobacco and manufactured tobacco substitutes;
- V Mineral products;
- VI Products of the chemical or allied industries;
- VII Plastics and articles thereof; rubber and articles thereof;
- VIII Raw hides and skins, leather, furskins and articles thereof; saddlery and harness; travel goods, handbags and similar containers; article of animal gut (other than silkworm gut);
- IX Wood and articles of wood; wood charcoal; cork and articles of cork; manufactures of straw, of esparto or of other plaiting materials; basketware and wickerwork;
- X Pulp of wood or of other fibrous cellulosic material; waste and scrap of paperboard; paper and paperboard and articles thereof;
- XI Textiles and textile articles;
- XII Footwear, headgear, umbrellas, sun umbrellas, walking-sticks, seat-sticks, whips, riding-crops and parts thereof; prepared feathers and articles made therewith; artificial flowers; articles of human hair;
- XIII Articles of stone, plaster, cement, asbestos, mica or similar materials; ceramic products; glass and glassware;

- 
- XIV Natural or cultured pearls, precious and semi-precious stones, precious metals, metals clad with precious metal and articles thereof; imitation jewelry; coin;
 - XV Base metals and articles of base metal;
 - XVI Machinery and mechanical appliances; electrical equipment; parts thereof; sound recorders and reproducers, and part and accessories of such articles;
 - XVII Vehicles, aircraft, vessels and associated transport equipment;
 - XVIII Optical, photographic, cinematographic, measuring, checking, precision, medical or surgical instruments and apparatus; clocks and watches; musical instruments; parts and accessories thereof;
 - XIX Arms and ammunition; parts and accessories thereof;
 - XX Miscellaneous manufactured articles;
 - XXI Other.
