## 1. EURO AREA

The ECB Governing Council assesses that essentials of euro area economy are sound, what is confirmed by latest data as well. The quarterly estimates for Q3 2007 reveal that GDP of euro area grew by 0.8%, or 2.7% on annual basis. The quarterly growth was contributed utmost by domestic demand (mainly private consumption) by 0.9pp, while slight negative contribution of external balance by 0.1pp eased the growth to 0.8%. But, seen in yearly basis both, domestic demand and external balance contributed positively to euro area GDP growth by 2.1pp and 0.6pp, respectively. The December estimates shows annual HICP inflation rate of 3.1%, from 2.1% in September 2007, primarily as a result of recent increases in oil and food prices. Unemployment in euro area is broadly improving, what is also revealed by current data. In November 2007, the unemployment rate stood at 7.2%, indicating a significant decrease of 0.8pp compared to November 2006.

The euro area current account (CA) in October 2007 showed a surplus of euro 2.0 billion (or euro 28.3 billion on 12-month cumulative basis), mainly induced by the surplus from trade in goods and services (euro 10.2 billion). However, the latter was offset by similar amount of deficit on current transfers account (about euro 10.0 billion). Recent developments in the financial markets worldwide influenced the euro area financial accounts also resulting in a deficit of euro 81.9 billion as of October 2007, generated by almost all positions of financial accounts except from direct investments that closed the account being in surplus of euro 21.3 billion. During Q4 2007 and at end 2007, interest rates remained same with the previous quarter: 4.0% on the main refinancing operations, 5.0% on the marginal lending facility, and 3.0% on the marginal deposit facility. Following the trend of previous quarter, euro currency appreciated against all three main currencies worldwide: US dollar, pound sterling and Japanese Yen. At end 2007, the euro traded at USD 1.47, GBP 0.74 and JPY 164.

## 2. SOUTH-EAST EUROPE<sup>3</sup>

An average GDP growth of 6.3% is estimated for all regional countries, for the year 2007. The highest GDP growth during Q3 2007 was announced by Montenegro with 7.1% increase on yearly basis, while the lowest of 5.1% was announced by Croatia. It is assessed that for this economic growth to be sustainable in the future, Montenegro will need to diversify its economy into additional sectors, than tourism and real estate. But at the same time the GDP growth in Montenegro was followed with higher inflation rate – 6.9% at Q3 2007; while Albania reported the lowest level of consumer prices among regional countries (an inflation rate of 3.5%).

With respect to current account balance, only estimate for Macedonia revealed a CA surplus (1.13% of GDP), while all other regional countries estimated a CA deficit as of 2007. As percentage to GDP the highest CA deficit (-40.92%) was estimated for Montenegro, and the lowest for Albania (-9.20%). Trade balance deficit, as a generator to CA, continues to be evident in estimates for each country, with Croatia experiencing the highest trade deficit (the latest reported USD 12.30 billion). In general, the exchange rate of corresponding currencies with respect to euro was stable, with no changes from previous period. Croatian Kuna improved slightly, ending 2007 at stronger level (HRK/EUR 7.3265) than it entered the year 2007.

<sup>1</sup>Developments in the euro area and SEE are based on: ECB Monthly Bulletin 01/2008; Emerging Europe Monitor, South East Europe, various issues.

<sup>2</sup> With focus in regional countries, such as: Albania, Bosnia and Herzegovina, Croatia, Macedonia, Montenegro, and Serbia.

December 2007

### 3. KOSOVO ECONOMY

#### 3.1. FINANCIAL SECTOR

During 2007 the level of deposits in overall financial sector increased quite rapidly. Only during Q4 2007, deposits at financial corporations (FC) increased with 8.7% compared to Q3 2007, bringing the level of deposits at FC to euro 1.12 billion. The order of depositors remain same to previous periods, with households as leader – possessing 60% of the total deposits (same level as in Q3 2007), followed by public Nonfinancial Corporations (NFC) holding 20.4% of total FC deposits (a slight decrease in share compared to the level of 22.6% in Q3 2007). Private NFC holds 17.3% of FC total deposits (an improved compared to only 14.3% of Q3 2007).

During Q4 2007 domestic claims increased considerable, approaching the level of first two quarters of the year. At end Q4 2007, domestic claims of financial sector amounted euro 123.9 million, yet far lower than in Q4 2006 when they accounted for euro 231.5 million, but more than double increase if compared to previous quarter. The increase on quarterly basis is mainly due to the constant level of deposits of central government (an increase by only 0.03%), and considerable increase in loans extended to real sector by 7.7% - that contributes positively to the overall level of domestic claims. At end Q4 2007, the deposits of central government within financial sector reached euro 851.7 million, of which about 47% or euro 405.8 million are KTA deposits accumulated in their CBAK accounts. While on the other side, amounting to euro 975.7 million claims on real sector soothed the overall level of FC domestic claims.

**Net Foreign Assets (NFA) continued to grow, being supported mainly from privatization deposits.** At end Q4 2007, the NFA of Kosovo financial sector reached euro 1.35 billion (2% higher than the level of Q3 2007), level which is exclusively induced from the high claims on nonresidents (euro 1.42 billion) over very low level of liabilities to nonresidents (euro 75.5 million). The large amount of NFA within FC is as a result of the CBAK assets being mainly deposited and invested abroad. The source of high level of CBAK NFA relies mainly on KTA deposits (privatization proceeds) being held within CBAK. CBAK NFA account for almost 78% of total FC NFA, the ODC NFA towards the total NFA account for 23.6%, while OFC and OFI recorded a negative balance with regard to NFA (their liabilities to nonresidents accounted for slightly hither than their claims).

Figure 1. Financial Corporations Net Foreign Assets

**CBAK granted final license to another foreign bank, increasing the number of foreign banks operating in Kosovo to 6, out of 8 commercial banks.** Following the licensing of Banka Kombëtare Tregtare (BKT) and Komercijalna Banka (KM) during Q3 2007, CBAK granted a final operating license also to Turk Ekonomi Bankasi (TEB) As a result of the new entries and the merger between Kasabank and Banka e Re e Kosovës that took place during Q3 2007, the banking sector of Kosovo comprises of eight commercial banks, of which only two have entirely domestic ownership, what gives significant dominance to foreign banks. Therefore, developments in foreign banks affect to a large extent developments in the overall banking sector. Banking

sector network in Q4 2007 numbered 236 banking units (231 units in Q3 2007), while the number of employees in the banking sector reached 2,854 in Q4 2007 from 2,839 in Q3 2007.

**Assets of the banking sector, with some changes in the structure, continued to grow.** Banking sector of Kosovo continues to expand also with regard to its asset size that reached euro 1.43 billion or 58.4% of GDP in Q4 2007 (54.5% of GDP in Q3 2007).<sup>4</sup> In volume, assets grew by 7.3% compared to the previous quarter, mainly driven by the increase in lending activity of the banking sector that contributed with 4.9pp. The increase could be partially attributed to the new entrants in the banking market. The structure of banking sector assets remains dominated by loans (62.2% of total assets in Q4 2007) that grew by 40.0% compared to Q4 2006, amounting euro 891.2 million in Q4 2007. The structure of assets in Q4 2007 was characterized by a lower share of balances with commercial banks that stood at 14.4% of total assets (17.5% in Q3 2007). Increase is noticed in the share of cash and balances with CBAK that reached 13.1% of total assets (12.1% in Q3 2007). The increase in cash and balances with CBAK mainly originates from the new entries in the banking sector that deposited the regulatory required amounts at CBAK.

**NFC loans maintain the main share in total loans; services remain the most credited sector.** Loans, as the main item of banking sector assets, are mainly comprised of NFC loans that represent 77.5% (mainly private NFC), while household loans represent the rest. The low share of household loans to total loans is mainly a consequence of the high level of interest rates on the one hand, and the low level of average wage on the other hand. The structure of loans granted to NFC has been fairly stable over time. Most credited sector remain services with 77.0% of total NFC loans (59.6% of total loans), among which trade absorbs the largest share (58.5% of total NFC loans), while loans to industry, construction, and energy sectors altogether represent 19.1% of total NFC loans. Least credited sector remains agriculture with 3.9% of total NFC loans (3.4% in Q4 2006).

**Loans maturity is continuously moving toward longer term maturity.** Banking sector in Kosovo is continuously gaining more confidence in the market. This is shown also by the continuous increase in loans maturity. Loans with maturity over 2 years in Q4 2007 represented 60.8% of total loans, which is an increase compared to 52.8% in Q4 2006. Loans with maturity of more than 1 year and up to 2 years declined to 17.0% of total loans (23.9% in Q4 2006), while those with maturity of up to 1 year recorded a decline to 22.2% (23.3% in Q4 2006), what indicates a redirection of lending towards loans of longer maturity.

Figure 2. ODC Loans and Deposits

**Deposits continue to grow with households representing the main source.** On the liabilities side, deposits remain the main component representing 79.6% of total banking sector liabilities in Q4 2007, a ratio that has been stable during the last periods. The amount of deposits in banking sector in Q4 2007 reached euro 1.14 billion, which is for 7.5% higher than in Q3 2007 and for 23.5% higher than in Q4 2006. The largest share of deposits originates from households that account for 59.1% of total banking sector deposits (55.8% in Q4 2006). Another important source of deposits is represented by NFC deposits that represent 35.2% of total deposits (37.0% in Q4 2006), of which 51.7% are public NFC deposits.

<sup>4</sup> GDP is an IMF estimate (IMF Aide Mémoire, October 2007).

December 2007

**Banking sector deposits continue to be mainly short term.** The structure of deposits did not record significant changes also with regard to the maturity structure. Transferable deposits are represented with 33.2% of total deposits, while other deposits (time and saving) remain the main component of total deposits representing 66.8%. Contrary to loans, where banks are showing increased confidence in market through longer loan maturities, the short maturity of deposits may indicate an uncertainty of depositors to deposit in long maturities. Deposits with maturity over 2 years represent the lowest share of other deposits with only 7.0% in Q4 2007, a ratio that has further declined compared to Q3 2007 when it stood at 8.3%. Deposits with maturity over 1 year and up to 2 years are represented with 13.5%, while the largest share consists of deposits with maturity of up to 1 year that compose 79.5% of other deposits.

**Liquidity position of the banking sector is favorable despite the maturity mismatch between loans and deposits.** The longer maturity of loans, in one hand, and the shorter maturity of deposits, on the other hand, is causing a maturity mismatch that may cause negative consequences for the liquidity of the banking sector. The highest mismatch exists for the maturity more than 2 years where loans exceed deposits by 487.6 million. However, this maturity mismatch can be partly covered by the surplus in the maturity up to one year, where deposits exceed loans by euro 408.3 million. In addition, loan to deposit ratio of 78.0%, which is within the regulatory limits (70%-80%), indicates a favorable liquidity position in the Kosovo banking sector (figure 2).

**The interest rate spread in the Kosovo banking sector is narrowing.** Q4 2007 marked a further decline in interest rate spread that dropped to 10.48pp from 10.62pp in Q3 2007. The decline in interest rate spread is mainly due to an increase in deposit interest rates (NFC and households) that rose to 3.58% in Q4 2007 from 3.45% in Q3 2007, while loan interest rates remained almost constant at 14.06% in Q4 2007 (14.07% in Q3 2007).<sup>5</sup> Interest rate spread for households stood at 10.64pp in Q4 2007, which is for 0.5pp higher than in Q3 2007, while the spread for NFC declined to 10.05pp from 10.79pp in Q3 2007. Consequently, interest rate spread for NFC recorded lower than for households, while during all the previous periods it was the opposite. This shift mainly resulted from the decline in loan interest rates for NFC (14.20% in Q4 2007 from 14.50% in Q3 2007), on the one hand, and the increase in loan interest rates for households (13.41% in Q4 2007 from 12.67% in Q3 2007), on the other hand.

### 3.2. FISCAL SECTOR

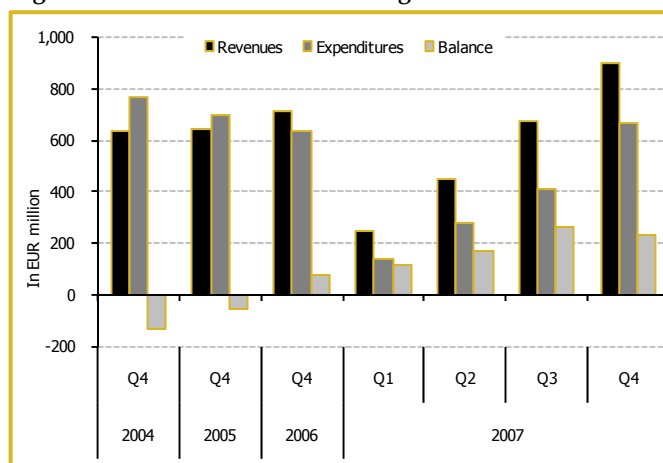

**Kosovo Consolidated Budget (KCB) recorded a surplus also in 2007.** The 2007 KCB surplus amounted at euro 233 million, 9.5% of GDP (3.2% in 2006). The surplus of KCB is mainly attributed to the increase in revenues (mainly non-tax revenues and border taxes) amounting at euro 896 million in 2007 while expenditures remained broadly as in 2006 (figure 3). During 2007, revenues were higher than planned by 42.6% (planned revenues for 2007 were euro 620.8 million). On the other hand, the planned government expenditure were euro 761 million, compared to euro 662 million actual level. (13.0% less than planned).

**Revenues amounted euro 896 million in 2007.** Border taxes still compose the main source of budget revenues represented by 59.3% of total KCB revenues (64.1% in 2006). Domestic taxes as a share to total KCB revenues decreased to 20.1% (23.0% in 2006), while in terms of level, they increased annually by 10.0% amounting at euro 180 million in 2007. Regarding non-tax revenues, they account for 17.3% (euro 154 million) of total budget revenues, whereas in 2006 this was only 8.0% (euro 57 million) showing more than double increase in non-tax revenues in 2007, of which euro 75 million are due to the license fee for the second mobile telephony operator. The only category that have decreased, both as a share and in volume as well, is the local government revenues which in 2007 consisted 3.3% of budget revenues, amounting at euro 29.3 million in 2007.

<sup>5</sup> Interest rates are averaged by weights of different products.

**Expenditures in 2007 stood at euro 662 million.**

Expenditures in 2007 over 2006 have increased by 4.3%. The structure of expenditures in 2007 remains relatively similar to 2006, consisting about 31.5% wages and salaries (32.1% in 2006), 21.9% purchase of goods and services (22.5% in 2006), 23.1% subsidies and transfers (24.5% in 2006) and 23.4% capital expenditure (21.0% in 2006). In terms of volume, highest increase is recorded in the category of capital expenditures (euro 16 million), while lowest belong to subsidies and transfers decreasing by euro 2.4 million (1.6%).

**Figure 3. Kosovo Consolidated Budget**

**Kosovo Pension Saving Trust (KPST) balance in Q4 2007 reached euro 278 million.** During Q4 pension contributions increased by euro 17.5 million. However, comparing with the Q4 2006 the increase in the pension contributions accounted for 30.5%. More than 97.0% of the total pension assets have been invested outside Kosovo, whereas only euro 5.5 million are placements in CBAK. 230 thousands contributors have an account in KPST, whereas the benefits from Trust have received 6830 contributors, amounting euro 3.5 million.

**3.3. REAL SECTOR****The year 2007 shows positive macroeconomic developments by continuous increase of private sector activity.**

Kosovo's GDP in 2007 experienced a real growth of 3.5% (figure 4). Excluding the donor sector, in Kosovo's GDP, we find a real GDP growth of 4.5%, which is lower by 1.5pp compared to the Western Balkans average. Economic growth of Kosovo mainly is driven by private sector that grew with 7.2% (115.7% of GDP). Within the structure of the private sector, investments increased by 14.6% totaling euro 647 million in 2007 which is 26.3% of GDP (euro 564 million in 2006), while consumption continued with similar trend, increasing by 5.2%. Private sector development is partly supported by banking sector loans. In addition to private sector, government investments (capital expenditures) increased as well, reaching a total of euro 138 million (euro 101 million in 2006), while government consumption decreased slightly at euro 288 million (euro 300 million in 2006) which in total accounts for 17.4% of the GDP. Regarding the donor sector, in 2007, it decreased at lower pace (by 1.7%) than previously (5.9% in 2006). Donor Sector mainly consists of wages and salaries (91.2%) in 2007, while the rest are investments, amounting euro 31 million (euro 43 million in 2006) which in total accounts for 14.5% of the GDP. Despite positive developments in private sector and the increase of GDP, concern for the Kosovo economy remains high current account deficit.

**Figure 4. GDP growth**

December 2007

**Vulnerable Consumer Price Index (CPI) as a result of import based economy.** During 2007, Kosovo faced an annual average inflation of 4.5%. On quarterly basis, Q4 2007 compared to Q3 have experienced an increase in CPI, on average, by 6.8%, while compared to Q4 2006 prices increased by 10.7%. In addition, CPI in Q4 2007 was also affected by the price increase of food and non-alcoholic beverages which in total contributed by 2.0pp. Prices decreased in textile by 2.3% and telephone and fax services by 5.1%, contributed to CPI by -0.1pp. During 2007, October is known for the second highest price increase (after August) and as the highest price increase in Q4 by 4.1% against prices of September. Price increase was affected to a large extent by the increase of prices of bread and cereals. In December 2007 over December 2006, CPI increased by 10.7%. At the same time frame bread and cereals prices were 52.2% higher than end 2006, contributing to inflation with 5.3pp. IMF projections suggest that prices in 2008 will be, on average, lower by 0.4%.

Figure 5. Price developments

**Persistent unemployment; another concern for the economy.** The registered unemployment in Q4 2007 continued with a broadly stable increase bringing the total number of registered job-seekers to around 335 thousand in end-2007, which is 2.6% higher than Q4 2006. Males represent 53.1% of registered job-seekers. More than 90% of registered job-seekers have been unemployed for a period longer than 12 months. Private sector remains the main generator of new jobs, announcing around 60% of them. On average, for 526 registered job-seekers one workplace is announced. In groups, those with higher education have a competition of 30 job-seekers for one workplace, while those which are considered as unqualified face the highest competition, 909 job-seekers for one workplace. On regional basis, with the worst position is Mitrovica where for one job created are available above 830 job-seekers, whereas the lowest competition in Kosovo is in the region of Gjilan where about 350 job-seekers are available to apply for one new job created. More than 90% of registered job-seekers are Albanians, about 3% Serbs and the rest are other minorities. In general, during 2007 was noticed that less jobs were created and this is mainly due to cuts in the public sector of the number of employees.

**The KTA accumulated revenues of privatization by end-2007 reached euro 405.8 million (17.1% of GDP).** In end 2006 revenues were euro 275 million, which shows that during 2007 the revenues increased by euro 130 million. The number of privatized SOE, in Q4, increased by 18 when preliminary results of the 28<sup>th</sup> and 29<sup>th</sup> wave were announced, only one SOE was privatized through Special Spin-Off (SSO), while the rest were on Ordinary Spin-Off (OSO). The number of hired employees to date reached 6165 while it is expected to reach 8034, all those in companies privatized through SSO. Up to date, the total number of signed contracts for privatized companies reached 345, consisting of 323 through OSO method and 22 using SSO method. 142 through OSO and 4 through SSO contracts are still pending, bringing the total number of signed and pending contracts to 491. In November was announced wave 30, the results of which are to be published in Q1 2008

3.4. EXTERNAL SECTOR

Despite the sharp increase of exports, trade deficit remains high. The trade balance of Kosovo, in 2007 compared to 2006, continued with increasing trends in both, exports and imports. Imports increased from euro 1,305 million to euro 1,575 million (19.9%), while exports increased by 32.3%, but the low base of exports brought them only to euro 146 million from euro 110 million in 2006. Given these figure the trade deficit for year 2007 stands at euro 1,428 million (euro 1,195 million in 2006).

The structure of exports and imports remains similar to previous year. Represented in cumulative within the quarter basis, in Q4 2007 exports were lower by 4.9% compared to Q3 2007, amounting euro 46.3 million and euro 48.7 million, respectively. Similar to exports, in Q3 2007 imports were the highest of the year, euro 453 million, while in Q4 2007 imports stood at euro 445 million. During entire 2007 about 45.7% of total exports are base metals and related, which compared to 2006 are lower by 2.2pp. Mineral products compose 15.4% of total exports (16.9% in 2006) while the third largest category with the share in exports is machinery, appliances, electrical etc. represented by 13.1% (6.9% in 2006). On the other hand, the structure of imports remained relatively similar to previous year, while mineral products still remains the most imported category (20.2%). The second largest category of imports is prepared foodstuff, beverages and tobacco (14.1%), followed by machinery, appliances, electrical etc. (12.5%) and so on.

Western Balkans and European Union; the main trading partners. In Q4 2007 Kosovo’s main trading partners remained relatively same to previous periods. In 2007 European Union (EU) countries are the main trading partners represented by 35% of total imports and 42% of total Kosovo’s exports. FYROM remains the second largest trading partner for Kosovo, with 11% of total exports and 15% of total imports. In addition, with 12.8% of total imports, Serbia is the third largest trading partner. Exports toward Serbia compose 11.9% of total exports. A large trading partner toward which Kosovo does not export is China, from which 6.6% of total Kosovo’s imports are. Imports from Turkey represent 6.4% of total imports, respectively. Exports toward Turkey are represented by 1.5%. Albania is the second largest trading partner regarding exports, absorbing 13% of Kosovo’s exports, whereas 2.3% of Kosovo’s imports are from Albania.

1/ Increase in assets and decrease in liabilities are recorded with sign minus, whereas decrease in assets and increase in liabilities are recorded with the sign plus.

2/ The asset side of portfolio investments includes resident transactions in securities issued by non-residents, whereas the liabilities side records the opposite.

3/ Since Kosovo use Euro currency as a legal tender, this is considered as a foreign asset and in this sense Cash held by the CBAK is considered as investment in abroad. The same is applicable to ODC.

## 5. EXPLANATORY NOTES

## TABLES 2-12: FINANCIAL SURVEY AND BALANCE SHEETS FOR THE FINANCIAL SECTOR

The *financial surveys*, inspired on the IMF-Manual on Monetary and Financial Statistics, are a subset of the financial accounts in the SNA 1993 and are based mainly on *balance sheets*, which are also published.

**Sources:**

CBAK: Accounting system; *Other depository corporations* (these are commercial banks): monthly Statistical Bank Report (SBR) based on CBAK-Amended Rule XI on Reports by the banks (Form Nr. 11); *Insurance companies*: Aggregated data from reporting scheme to the Insurance Supervision Department of CBAK; *Pension Funds and Other financial institutions*: aggregated data from reporting to the Pension Supervision Department and Banking Supervision Department of CBAK.

**Classifications:**

***Institutional sectors (SNA 1993 compatible)***. The economy is composed of economic units, which may be defined as economic entities that are capable, in their own right, of owning assets, incurring liabilities and engaging in economic activities and in transactions with other entities. The institutional sectors group similar kinds of institutional units. CBAK has used the scheme presented below.

|  |
|--|
| <p><b>A. Domestic economy</b></p> <p><i>Non-financial corporations</i></p> <p>Public non-financial corporations</p> <p>Other non-financial corporations</p> <p><i>Financial corporations</i></p> <p>Central bank</p> <p>Other depository corporations</p> <p>Other financial corporations</p> <p><i>Insurance companies</i></p> <p><i>Pension funds</i></p> <p><i>Financial auxiliaries</i></p> <p><i>Other financial institutions</i></p> <p><i>General government</i></p> <p>Central government</p> <p>Local government</p> <p>Social security funds</p> <p><i>Households</i></p> <p><i>Non-profit institutions serving households</i></p> <p><b>B. Rest of the world.</b></p> |
|--|

The **financial corporations** sector consists of all resident corporations or quasi-corporations principally engaged in financial intermediation or in auxiliary financial activities, which are closely related to financial intermediation.

Central Banking Authority of Kosovo (CBAK) complies not entirely with the definition of a monetary authority, as it issues no banknotes. In the financial surveys the "CBAK" is mentioned instead of 'central bank'.

*Other depository corporations (ODC)*: In Kosovo these are the commercial banks licensed in Kosovo.

December 2007

*Other financial intermediaries (OFI)* consist of all resident corporations engaged in financial intermediation except depository corporations, insurance corporations and pension funds (cf infra). In the financial surveys on Kosovo, this sub-sector is composed entirely by the 'Micro Finance Institutions' and the 'Other non-bank

financial institutions'. These financial institutions are engaged in lending to small scale business and individuals, mainly in rural areas and the funding is provided mainly by donors.

*Insurance companies (IC)* consist of incorporated, mutual and other entities whose principal function is to provide life, accident, sickness, fire or other forms of insurance to individual institutional units or groups of units.

*Pension funds (PF)* are established for purposes of providing benefits on retirement for specific groups of employees and consist of:

- *Individual Savings Pension managed by KPST complemented with additional voluntary contributions paid by the employer or the employee, or both;*
- *Supplementary Employers Pensions, provided to employees by their employer;*
- *Supplementary Individual Pensions, provided to natural persons from licensed pension provider.*

*Financial auxiliaries.* In Kosovo this sub-sector comprise the exchange offices and money transfer services. As their contribution to the outstanding amounts of deposits with the other financial institutions in Kosovo is limited, their position is, in contrast to the financial sub-sectors mentioned before, not presented separately in the final surveys.

*Remarks:* Due to the lack of an operational enterprise register, the reporting agents do allocate the unincorporated business to the sector of the non-financial corporations. This leads to a blurred distinction between households and non-financial corporations in the statistics. *Non-profit institutions serving households (NPISH)* comprise religious societies and social, cultural, recreational and sports clubs, charities, relief and aid organizations financed by voluntary transfers in cash or in kind from other institutional units.

#### ***Financial instruments (SNA 1993 compatible)***

The SNA 1993 classifies also financial instruments into groups of instruments with similar characteristics. The most important in the current context are briefly described.

Currency and deposits consist of *Currency* comprises those notes and coins in circulation; *Transferable deposits* comprise all deposits that are exchangeable on demand at par, , freely transferable by check; *Other deposits* include all claims, other than transferable deposits, on the central bank, other depository institutions. Typical forms of deposits are non-transferable savings deposits and term deposits. Within the framework of the definition of money aggregates a further distinction according the original maturity has been made.

*Securities other than shares* include bills, bonds, certificates of deposit, commercial paper traded in the financial markets. These kind of financial assets do not yet appear on the liability side of the financial sector in Kosovo.

Loans include all financial assets that are created when creditors lend funds directly to debtors and evidenced by non-negotiable documents.

*Shares and other equity* comprise all instruments and records acknowledging, after the claims of all creditors have been met, claims to the residual value of corporations.

*Insurance technical reserves* are subdivided in *Net equity of households in life insurance reserves and pension funds*. Life insurance reserves are considered assets of the insured persons or households and pension funds consist

of the reserves held by funds established by employers and/or employees to provide pensions for employees after retirement; *Prepayments of premiums and reserves against outstanding claims*. Insurance premiums are due to be paid at the start of the period covered by the insurance, and this period does not normally coincide with the accounting period itself. Therefore parts of the insurance premiums payable during the accounting period are intended to cover risks in the subsequent period;

*Reserves against outstanding claims* are reserves that insurance enterprises hold in order to cover the amounts they expect to pay out in respect of claims that are not yet settled or claims that may be disputed.

*Other accounts receivable/payable*, mainly consist of accounts receivable and payable, other than those described previously value of corporations.

**Definition(s) and methodological notes:**

The bilateral positions of the individual institutions are netted out and subsequently the bilateral positions between the sub-sectors at different stages are netted out leading to a *consolidated position* of the entities considered. This differs substantially from a simple aggregation. The consolidation is complete as far as it concerns the traditional financial instruments. The data available do not permit for an adequate consolidation of the accruals and most of the other payables/receivables for which the data reported by individual financial institutions does not contain a breakdown of the counterparts by institutional sub-sector. For the consolidation the following sequence is applied.

- FC Financial corporations;
- DC Depository corporations;
- CBAK Central banking authority of Kosovo;
- ODC Other depository corporations;
- OFC Other financial corporations;
- IC Insurance companies;
- PF Pension funds;
- OFI Other financial intermediaries;
- FA Financial auxiliaries.

The surveys of the sector and the sub-sectors are presented according to a common framework:

|   |
|---|
| <p><b>Net foreign assets (+/-)</b><br/>         Claims by instrument<br/>         Liabilities by instrument</p> <p><b>Domestic claims</b><br/>         Net claims on government sector<br/>         Claims on other sub-sectors<br/>             Instrument<br/>             Counterpart (institutional sector)</p> |
|---|

December 2007

|  |
|--|
| <b>Domestic liabilities</b>                                  |
| Claims on other sub-sectors                                  |
| Instrument   |
| Counterpart (institutional sector)                           |
| <b>Shares and other equity</b>                               |
| <b>Other items (+/-), including consolidation adjustment</b> |

The *counterpart* is defined as the institutional sector on which the holder of an instrument has a claim. In case of a term deposit by a non-financial corporation with a commercial bank, the corporation has a claim on the commercial bank. In case of a security, the holder has a claim on the issuer of the security (for instance a corporation who issued shares), regardless from whom it was bought. Along the same lines of reasoning, a holder of a currency note has a claim on the issuer, namely a central bank. In the special case of Kosovo, this implies that holders of euro-currency notes do have a foreign claim and enters in the foreign assets.

The *residency* criteria set forward by the SNA 1993 can not be followed in all details, as the residency /non-residency dichotomy is mainly based on address information in the files of the reporting institution. The country indicated in those files does not necessarily correspond with the country where the client has its main center of economic interest.

The *valuation* of the financial instruments follows the market value for securities and the nominal value for deposits and loan, which are not adjusted for possible provisions made by the creditor. The financial instruments in foreign currencies, other than euro, are converted against the euro exchange rate prevailing at the end of the reporting period.

The surveys on CBAK, "Other depository corporations" and 'Depository corporations' are established at monthly *frequency*, while those on "Other financial intermediaries", "Insurance companies", "Pension funds" and "Financial corporations" are available at a quarter frequency. The data published are not adjusted for eventual seasonal effects.

Remarks: *The data on the Supplementary Individual Savings Pension schemes managed by KPST are not yet made available by KPST. The data structure on Other Financial Institutions is based on their annual accounts structure.*

#### TABLE 17: EFFECTIVE INTEREST RATES APPLIED BY COMMERCIAL BANKS

**Source:** CBAK-survey 'Interest Rate Report' of commercial banks licensed in Kosovo.

**Definitions and nature of the data collected:** The main features are listed below:

|                           |  |
|---------------------------|--|
| 1. Reporting institutions | All commercial banks licensed in Kosovo  |
| 2. Financial instruments  | Loans<br>Deposits                        |
| 3. Currency denomination  | EUR only                                 |
| 4. Frequency              | Monthly                                  |
| 5. Counterparts           | All domestic non financial corporations; |

|                             |  |
|-----------------------------|--|
|                             | All domestic households  |
| 6. Reported contracts       | New business during the reference month / outstanding amount (depending on the type of financial instrument, cf. infra)  |
| 7. Type of interest rates   | Annual interest rate not including any fees nor commissions  |
| 8. Method of calculation    | Annual agreed rate or Actuarial rate (depending on features of the specific contract, cf. infra)   |
| 9. Reported rate and volume | <ul style="list-style-type: none"> <li>- One interest rate by category averaged with the weights of the new business of the reference month or outstanding amounts (depending on the type of financial instrument - cf. infra) and;</li> <li>- the total new business volume or outstanding amounts (depending on the type of financial instrument - cf. infra).</li> </ul> <p>A category is defined by 5 variables and forms the combination of:</p> <ul style="list-style-type: none"> <li>- the type of financial instrument;</li> <li>- the sector allocation of the counterpart;</li> <li>- the maturity band and;</li> <li>- the range of amount involved;</li> <li>- the purpose of financing in the case of loans</li> </ul> |

The annual rate to be reported by the commercial banks is the annual agreed rate (AAgR) or the annual actuarial rate (AAcR).

The *Annual Agreed Rate* (AAgR) is to be reported in all cases where there is no capitalization or the capitalization follows a regular pattern or the interest is charged on the remaining outstanding capital and no grace periods for interest payments or capital redemption are granted.

In all other cases the *Annual Actuarial Rate* (AAcR) has to be reported. This is the annual interest rate equaling the discounted (actualized) future cash inflows to the nominal amount of the loan or deposit.

The interest rate communicated by the commercial banks takes account of the interest rate on all individual transactions during the reference period, with 2 two exceptions : for saving deposits and current accounts, the interest is calculated by the bank as:

- the interest rate on each outstanding contract at the end of the reference month, weighted with the outstanding amount of the contract at the end of the reference period, or;
- the cumulative interest flows (accrued interest) over the month divided by the average of the daily outstanding amounts.

**IRR statistics:** A weighted interest rates communicated by banks are calculated. The market share of each bank having a new business during the reference month in the particular product serves as the weight.

The criteria set for the interest rates to be published are:

1. Minimum three observations for each product;
2. The standardized variance calculated for each product, as a measure of the dispersion among the observed interest rates, should not exceed 0.60 for deposits and loans;
3. If the second criterion is not fulfilled, then the market share for the observation which is an outlier should not exceed 0.33.

December 2007

**TABLE 19: CBAK INTERBANK CLEARING SYSTEM**

The Interbank Clearing System (ICS) is established, regulated and managed by the CBAK. It started with operation in May 2001. The ICS is an electronic clearing and settlement service for payment orders among banks and the CBAK, and with the CBAK as an agent of the PISG (Ministry of Finance and Economy) of Kosovo. It offers end of day net settlement on accounts at the CBAK for single orders and/or bulk paper listings of multiple orders such as mass salary payments. The service permits the exchange of electronic data delivered via telephone lines to the CBAK electronic clearinghouse. Currently there are seven commercial banks participating at the ICS, and CBAK itself, which acts as a fiscal agent for the Ministry of Finance and Economy. ICS operates based on Operating Rules for Electronic Interbank Clearing and Settlement Service (EICS) of the CBAK.

**TABLE 20: INTERNATIONAL MONEY TRANSFERS AMONG FINANCIAL CORPORATIONS**

**OUTGOING:** The movement of money from account of bank or other financial corporation within Kosovo to the account in bank or other financial corporation accounts outside Kosovo.

**INCOMING:** The movement of money from an nonresident bank or other financial corporation account in the bank or financial corporation account within Kosovo.

**WIRE TRANSFERS AGENCIES:** All non-bank financial institutions performing electronic or wire transfer services (Union financiar Prishtina, Western Union PCB, Western Union RZB, Monedha, K.L.M. Enterprises, D.M.TH. - Money Gram).

**TABLE 25: KOSOVO CONSOLIDATED BUDGET**

**PAYMENTS TO HOUSEHOLDS:** Starting from 2002, payments to households are included within subsidies and transfers.

**RESERVES:** Reserves include amounts authorized for contingent expenditures that may be used only for urgent and unforeseen requirements.

## TABLES 28-35: BOP METHODOLOGICAL NOTES

The Central Banking Authority of Kosovo (CBAK) is responsible for compiling the Balance of Payments Statistics for Kosovo. The legal basis for collecting and compiling BOP statistics rely on the UNMIK Regulation 2006/47 on Central Banking Authority of Kosovo. The main data sources for compiling BOP are commercial banks (through International Transaction Reporting System), Statistical Office of Kosovo (balance of trade statistics) and Enterprise Surveys. Data are supplemented with information received from other sources as well as own estimates. The compilation of BOP is made in accordance with the IMF Balance of Payments Manual, fifth edition (BPM5). The BOP statistics are published in several CBAK publications such as: CBAK annual report, CBAK Bulletin and CBAK Monthly Statistics Bulletin, and are updated accordingly.

Balance of payments is one of the key economic statistical information that systematically summarizes, for a specific period of time, the economic transactions of Kosovo residents with the rest of the world. Economic transactions are inward transactions (receipts) and outward transactions (payments). Receipts from the rest of the world are recorded in the credit side and include economic transactions such as exports of goods, exports of services, income flows, financial flows and transfers, which are offsetting entries to any one-sided transactions. Conversely, payments by domestic citizens to the rest of the world (non-residents) are recorded in the debit side and include economic transactions such as imports of goods, import of services, income flows, financial flows and transfers.

Conceptually, an economic transaction has two sides: something of economic value is provided and something of equal value is received through the double-entry recording system. When an economic value is provided (e.g. Kosovo exports) a credit entry is made, and when an economic value is received (e.g. Kosovo imports) a debit entry is made. Where something of economic value is provided without something of economic value in exchange the double entry system requires an offset to be imputed (a transfer entry) of equivalent value. For example, food imported as aid requires a debit entry for the goods item and a credit transfer as offset. The example below illustrates how the double entry system is applied. By definition, under the double-entry system credit entries must equal debit entries.

| Credit entries  | Debit entries   |
|---|---|
| Changes in all economic resources provided by Kosovans to non-residents, including: | Changes in all economic resources received by Kosovans from non-residents, including: |
| - Exports of goods and services   | - Imports of goods and services   |
| - Income receivable   | - Income payable  |
| - Transfers which are offsets to debit entries                                      | - Transfers which are offsets to credit entries                                       |
| - Increase in financial liabilities of the Kosovo to non-residents                  | - Increase in financial claims of Kosovo on non-residents                             |

**RESIDENCY CRITERIA.** Residents of Kosovo are legal entities registered and operating in Kosovo and natural persons whose domiciles (households) are located in Kosovo and who do not leave Kosovo for a period exceeding one year (except students and medical patients). Due to its specificity, special emphasis has been put on the treatment of UNMIK, KFOR, and other international staff in Kosovo.

- 1) **Treatment of UNMIK.** Based on the residency criteria as stated in the balance of payments manual (BOP5, paragraph 88), UNMIK is an international organization and, therefore, fulfills conditions to be classified as a nonresident of Kosovo. In this case, distinction should be made between the UNMIK as institution as well as UNMIK staff:
  - a. UNMIK as an institution is treated as nonresident in balance of payments transactions;
  - b. UNMIK international staff residency is determined on the basis on the length of their stay in Kosovo:

December 2007

- i. UNMIK international staff with a contract for one year and more is treated as resident of Kosovo;
- ii. UNMIK international staff with a contract of less than a year is treated nonresident of Kosovo.

Records in BOP are made based on the study conducted by the UNMIK European Union Pillar "UNMIK's Impact on the Kosovo Economy" published in July 2006. Based on this publication, data for 2006 are forecasted. We updated data through actual figures based on the information provided directly from UNMIK to the CBAK.

The assumptions and estimates related to transactions of UNMIK as institutions and the staff is as follows:

- a. Spending of UNMIK (as institution) for goods and services purchased from Kosovar companies are considered as exports of government services.
- b. UNMIK international staff that are considered as residents spend around 14% of their salaries in Kosovo. The remaining part of 76% are send in their home countries (remittances) and 10% is spend for traveling abroad (travel services).
- c. UNMIK international staff as nonresident (short-term international staff of UNMIK) spend 14% of their salary in Kosovo for living allowance.

Through a hypothetical example we tried to show implication of UNMIK in Kosovo's BOP, based on our above mentioned assumptions:

Assuming that UNMIK budget is €100, of which:

|  |     |
|--|-----|
| — Wages to resident international staff    | 55  |
| — Wages to nonresident international staff | 3   |
| — Wages to local staff                     | 17  |
| — Staff assessment income (Tax paid to UN) | 5   |
| — Imported goods                           | 8   |
| — Local goods                              | 2   |
| — Imported services                        | 6   |
| — Local services                           | 4   |
| Total UNMIK's Budget                       | 100 |

By applying the previous example into the double entry system, records in BOP will be as follows:

|  | Credit | Debit |
|--|--------|-------|
| Current account  |        |       |
| Travel Services  |        |       |
| Short-term staff spending for living allowance (14% of salaries) | 0.4    |       |
| Long-term staff spending for traveling abroad (10% of salaries)  |        | -5.5  |
| Government services  |        |       |
| Spending of UNMIK (as institutions) for local goods and services | 6      |       |
| Compensation of employees  |        |       |
| Salaries of Short-term staff                                     |        | -3    |
| Current transfers  |        |       |
| Total budget of UNMIK less imported goods & services             | 85     |       |
| Remittances (76% are send to their relatives abroad)             |        | -41.8 |
| Tax paid to UN for resident staff (around 8.1% of Wages)         |        | -5.8  |

Due to the mentioned treatment of UNMIK, its expenses for import of goods and import of services are considered as nonresident–nonresident transactions and not recorded in BOP.

- 2) **Treatment of KFOR.** KFOR is a NATO led international force responsible for establishing a safe and secure environment in Kosovo. KFOR entered Kosovo on June 12, 1999 under a United Nations mandate, two days after the adoption of UN Security Council Resolution 1244. KFOR contingents are grouped into four multinational task forces and troops come from 35 NATO and non-NATO nations. Under international standards, KFOR is a military contingent and, therefore, a nonresident of Kosovo;
- 3) **Treatment of International Staff in Kosovo (excluding UNMIK).** In accordance with the SNA 93 and the BPM5 the international staff in Kosovo engaged in technical assistance or other activities on behalf of the Kosovo institutions is treated based on the length of their stay. The international staff of Foreign Liaison Offices and other offices of international organizations in Kosovo (diplomats, military personnel, and other employees of such organizations and their family members, who reside in Kosovo and enjoy immunity and diplomatic privileges) are treated as nonresidents of Kosovo.

**CURRENT ACCOUNT.** The Current Account comprises the acquisition and provision of goods and services, income, and current transfers between the country and the rest of the world.

- 1) **Goods.** The source of the data on international trade statistics is UNMIK customs service, processed by the SOK. The CBAK receives on a monthly basis the data on international trade statistics from the SOK, based on the SLA between the two institutions. CBAK makes adjustment for coverage and classification based on the supplementary information from other sources. Adjustments for coverage are made in the credit side for electricity, based on enterprise survey with KEK and for import of goods as donation provided from MEF for the year 2004 that were not included in SOK statistics. Adjustments for classification are made to value exports and imports in f.o.b. basis. The data on imports of goods are adjusted by application of c.i.f. / f.o.b. ratio of 6.5% (5% for transportation and 1.5% for insurance), excluding imports from neighboring countries which are valued at f.o.b. basis. Estimates are done by analyzing the value of c.i.f. to total value of imports of goods for a specific period, based on the information from SAD;
- 2) **Services.** Trade in services covers the provision of services by residents to non-residents and vice versa. The services component of the BOP consists of: transportation, travel, government services (not included elsewhere) and other services, which are subdivided into further items (communication, construction, insurance, financial, computer and information, royalties and license fees, other business services, personal services and government services);
  - a. *Transportation.* Covers sea, air and other (i.e. rail, land and pipeline) transport. It includes the movement of passengers and freight and other related transport services, such as chartering of aircraft with crew, cargo handling, storage and warehousing, towing, pilotage and navigation, maintenance and cleaning, and commission and agents' fees associated with passenger/freight transportation. The passenger transport is estimated based on the number of average passenger air fares travelling through Prishtina Airport multiplied with the average cost of one ticket. The data on passenger transportation are retrieved from the Prishtina Airport. The value of freight transport services is estimated on the basis of difference between the value of imported goods at c.i.f. and f.o.b. values (debit side). The source of data is the information provided from Prishtina Airport. The ratio of freight transport to the total amount of c.i.f. imports is considered to be 5%. Imports from neighboring countries are considered to be in f.o.b. basis. Receipts for commission and agent fees for transport related services as well airport landing fees are recorded in credit side;

December 2007

- b. *Travel services*. Cover services provided to non-residents during trips in Kosovo (credit), and provided to Kosovo residents during similar trips abroad (debit). The exceptions are those military and diplomatic personnel (i.e. KFOR and Liaison Offices), whose expenditure are recorded under government services.
- c. *Business travel*. Covers all type of business activities such as carrier crews stopping off or lying over; government employees on official travel; employees of international organizations on official business (e.g. technical assistance); and employees doing work for enterprises that are not resident in the economies in which the work occurs. Business travel is estimated based on the data from enterprise surveys and data from ITRS.

Personal travel includes all travelers going abroad (coming in Kosovo) other than business travel. This includes also expenses for accommodation of UNMIK short-term staff in Kosovo (in credit side) and spending for travel abroad of UNMIK long term staff considered as residents of Kosovo (in debit side). It is assumed that the short-term international staff spends around 14% of their salaries in Kosovo for commodities. This estimate is done based on the study conducted by Economic Policy Office of UNMIK's Pillar 4. Another important source of information for personal travel is derived from Household Budget Survey regarding consumption by Kosovar diaspora during their visits in Kosovo. The expenditure of Kosovars going for vacation is done by combining the information from central banks in the region (Bank of Albania and Central Bank of Montenegro), as well as ITRS data.

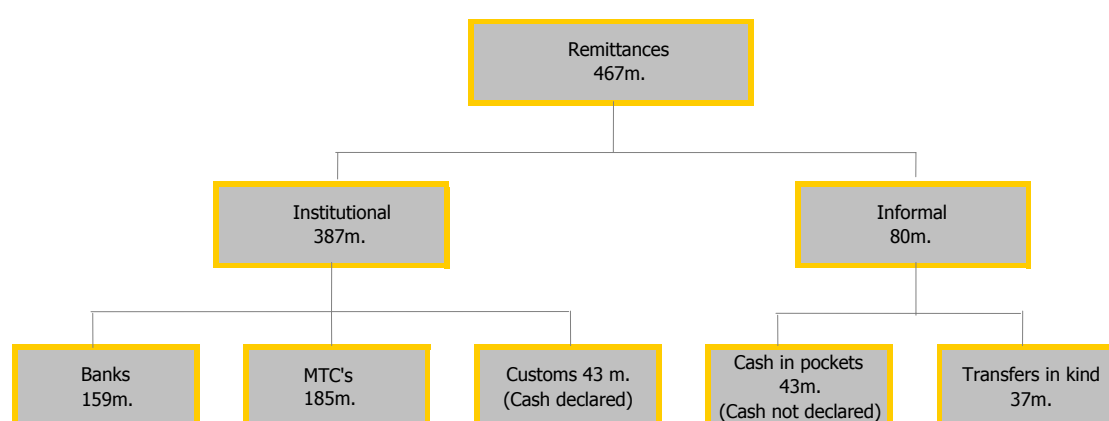

- d. *Government services (not included elsewhere)*. Is a residual category covering government service transactions (including those of international organizations) not contained in the previous classifications. Government services include also all transactions by liaison offices, and export of goods and services to KFOR. Sources of the data are different such as ITRS, Liaison Offices, municipalities, etc.
  - e. *Other services*. Under this category are included exports and imports of communication services, construction services, insurance services, financial services, royalties and license fees, personal, cultural and recreational services and other business services. Source of data are enterprise surveys and ITRS.
- 3) **Income**. The income component relates to income earned from two factors of production: labor and capital. Consequently, the income consists of compensation of employees and investment income:
- a. *Compensation of employees*. Covers wages, salaries and other benefits paid to non-resident workers in the country, or received by resident workers abroad. In this context, includes seasonal or other short-term workers (less than one year) and border workers who have centers of economic interest in their own economies. Compensation of employees paid to Kosovans working for international organizations, and KFOR are recorded under credit side (excluding local employees working for UNMIK which are recorded under current transfers). In the debit side are recorded salaries of UNMIK international employees with a contract for less than one year, and which are treated as a nonresident, since the amount is previously recorded under current transfers. The compensation of employees is calculated based on various sources of information including data collected directly from UNMIK, KFOR, MEF, Liaison Offices, and from other international organizations;
  - b. *Investment income*. Covers receipts and payments of income associated with external financial assets and liabilities. The main component of investment income represents income from direct investments, portfolio and other investments. The most typical form of income from abroad is interest earned from deposits or securities with foreign banks. In the debit side are included payments to direct investors in Kosovo like dividends, reinvested earnings, interest paid for loans borrowed from abroad, etc. The main sources of information on the investment income are reports of commercial banks, insurance companies and the CBAK;

- 4) **Transfers.** Transfers are offsetting entries for real resources or financial items provided without receiving in return any good, service, or financial item. Transfers are separately identified as either current or capital transfers;
- a. *Capital transfers* consist of transfers (1) involving ownership of fixed assets, (2) transfers of funds linked to, or conditional upon, acquisition or disposal of fixed assets, or (3) cancellation of liabilities by creditors without any counterparts being received in return.
  - b. *Current transfers* are sub-divided into those of central government and other sectors;
    - i. General government includes:
      - (1) Grants to the Kosovo Consolidated Budget (Donor Designated Grants)
      - (2) Donor aid, in kind (Public Investment Program)
      - (3) Direct spending of the UNMIK and its pillars.
    - ii. Other sectors – whose current transfers are further divided into:
      - (4) Worker remittances (mainly migrants transfers); and
      - (5) Other transfers – include insurance premiums and claims, pensions, some grants related to different institutions.

The main data sources for the estimate of current transfers are UNMIK, MEF (donor coordination unit), ITRS, and Household Budget Survey (conducted from the SOK).

*Worker remittances.* Cover current transfers by migrants who are employed in other economies and considered residents there. A migrant is a person who comes to an economy and stays for a year or more. Persons who stay in new economies for less than a year are considered nonresidents; their transactions are appropriate mainly to the component for compensation of employees (BPM5, paragraph 269 through 272).

*Estimate of inflows from Kosovo migrants living abroad* - The estimate of incoming remittances is done based on main channels of the flows. A variety of data sources is used to measure income flow. We focused mainly to identify registered flows coming through official channels (banks, MTCs and money declared at the Customs Authorities) and remittances coming through informal channels (not declared, such as cash that pass through customs, non-cash transactions like goods transferred from migrants living abroad (see scheme below).

*Estimate of outflows of resident foreigners.* In debit side of remittances, the estimate includes remittances related to (1) international staff - long term working for UNMIK and (2) other international staff engaged in other projects (i.e. PIP). It is estimated that resident foreigner's sends 76% of their salaries to their relatives. Data source in debit side are the budget of UNMIK and RIMS database of the Ministry of Economy and Finance for Official Development Aid spend in Kosovo.

December 2007

*Other Donor Assistance (ODA) to the government.* Technical assistance is ongoing support of the international community to strengthen the institutional aspect of the Provisional Institutions of Self-Government (e.g. revenue collection, investment in physical and human capital, etc.). ODA to Kosovo has been mainly committed and disbursed through the following types of intervention: capital investment, technical assistance, supply of equipment, credit (investments in infrastructure), training and other. Records in BOP are made based on the study conducted by the Donor Coordination Center. The main assumptions and estimates related to ODA transactions and the staff are as follows:

1. 67 percent of wages are dedicated to international staff. All international staff are residents of Kosovo and they spend around 14% of their wages in Kosovo. The remaining part of 76% are sent in their home countries (remittances) and 10% is spent for traveling abroad (travel services).
2. Wages to local staff are 13 percent from total wages.
3. From total goods and services 91.5% are imported goods.

Table 1.5. Nature of ODA Spending

| Description                  | 2004    | 2005    | 2006    |
|------------------------------|---------|---------|---------|
| Wages of International Staff | 92,002  | 106,906 | 143,324 |
| Wages - local staff          | 30,361  | 35,279  | 47,297  |
| Goods & Services             | 77,081  | 30,586  | 41,006  |
| Imported                     | 70,529  | 27,987  | 37,520  |
| Local Produced               | 6,552   | 2,600   | 3,485   |
| Capital Investments          | -       | 500     | 670     |
| <b>TOTAL</b>                 | 169,083 | 137,993 | 185,000 |

**CAPITAL ACCOUNT.** Under *capital account* are included some investments in construction made by KFOR and migrant transfers. The main source of information for migrants' transfers is ITRS.

**FINANCIAL ACCOUNT.** Covers transactions in foreign financial assets (claims on nonresidents) and foreign financial liabilities (liabilities to nonresidents). The four categories (direct investment, portfolio investment, other investment and reserve assets) are based primarily on the relationship between the parties, and secondly on the nature of the instrument involved.

1. **Direct investments** - is a category of international investment that, based on the equity ownership of at least 10%, reflecting a lasting interest by resident in one economy (the direct investor) in the resident enterprise in another economy (the direct investment enterprise). Using this criterion, a direct investment relationship can exist between a number of affiliated enterprises, whether the linkage involves a single chain or a number of chains. The components of direct investment transactions are:
  - a. Equity capital - comprises investment in branches, shares in subsidiaries and associates (except non-participating preferred shares that are treated as debt securities), and other capital contributions;
  - b. Reinvested earnings - consist of the off-setting entry to the corresponding current account income item: it is the direct investor's share of the undistributed earnings of its branches, subsidiaries and associates;
  - c. Other capital - covers all other inter-affiliate financial transactions (borrowing and lending of funds), including debt securities and trade credit.

Following the recommendations of the IMF, ECB, Eurostat and OECD, direct investment flows are recorded on a directional basis (rather than the more usual assets/liabilities basis): direct investment abroad – as an asset, and direct investment in the reporting country – as a liability. Direct investment abroad covers net investment by parent companies resident in Kosovo in their foreign branches, subsidiaries and associated

companies. Direct investment in Kosovo covers the net investment by foreign companies in their affiliates located in Kosovo. The CBAK uses different sources of information for the calculation of FDI. The main sources of information for the estimate of FDI in Kosovo are Kosovo Trust Agency (KTA), commercial banks reports to CBAK, and ITRS.

2. **Portfolio investment** - covers the acquisition and disposal of equity and debt securities, which cannot be classified under direct investment or reserve assets transactions. The securities involved are traded (or tradable) in organized and other financial markets. Debt securities cover bonds and notes, which have an original maturity term of more than one year, and money market instruments with original maturity of one year or less. Data on debt securities in the case of Kosovo includes investments in securities abroad from CBAK and commercial banks. The main sources of information on portfolio investment are the data provided by the CBAK, and commercial banks operating in Kosovo.
3. **Other investment** - covers assets and liabilities other than those classifiable to direct investment, portfolio investment or reserve assets. It comprises short and long-term loans, currency and deposits, trade credits and other assets and liabilities. Short-term trade credits comprise the advance payment by nonresidents for the future exports (on the liability side) and expected post-payments from nonresidents for exports (on the asset side). The estimate of trade credits is done by using the ratio of those two categories to total imports and exports reported in ITRS. Information about currency and deposits, loans and other assets are obtained from balance sheet of commercial banks, balance sheet of CBAK, MEF (government deposits abroad), balance sheet of other financial institutions, ITRS (deposits and loans of non-financial entities with abroad) and enterprise surveys (other accounts payable/receivable).
4. **Reserve assets** - consist of those external assets that are readily available to, and controlled by, monetary authorities for direct financing of payments imbalances, for indirectly regulating the magnitude of such imbalance through intervention in exchange markets to affect the currency exchange rate and/or for other purposes (BPM5, p. 424). Reserve assets consist of: Monetary gold, Special Drawing Rights, Reserve position in the Fund, foreign exchange (currency and deposits, and securities), other claims.
  - a. *Other foreign currency assets* refer to foreign assets of the monetary authorities that are not included in reserve assets, but as reserve assets, must be liquid foreign currency assets that meet the criteria of being available for use by the authorities in the time of a crisis. Following the reserve assets definition only two components of the CBAK foreign assets and liabilities meet the main characteristics of reserve assets (to be readily available and to be controlled by the CBAK): Euro in cash and reserve deposits of banks with CBAK. Consequently these components are classified in BOP as reserve assets. Data sources are obtained from balance sheet of the CBAK.

**NET ERRORS AND OMISSIONS.** The sum of the credit entries should in principle equal the sum of the debit entries over the period. In practice, because some transactions may not be captured or because of differences in coverage, valuation and timing of transactions, exact symmetry does not occur and the balancing item *net errors and omissions* is inserted to balance the overall account. Ideally, the scale of this item should be relatively small in relation to the combined value of all credit and debit transactions expressed in absolute terms.

December 2007

**TABLES 36-39: EXPORTS AND IMPORTS**

Harmonized system coding system used in the presentation of external trade statistics by commodity group:

- I Live animals; animal products;
- II Vegetable products;
- III Animal or vegetable fats and oils and their cleavage products; prepared edible fats; animal or vegetable waxes;
- IV Prepared foodstuffs; beverages, spirits and vinegar; tobacco and manufactured tobacco substitutes;
- V Mineral products;
- VI Products of the chemical or allied industries;
- VII Plastics and articles thereof; rubber and articles thereof;
- VIII Raw hides and skins, leather, furskins and articles thereof; saddlery and harness; travel goods, handbags and similar containers; article of animal gut (other than silkworm gut);
- IX Wood and articles of wood; wood charcoal; cork and articles of cork; manufactures of straw, of esparto or of other plaiting materials; basketware and wickerwork;
- X Pulp of wood or of other fibrous cellulosic material; waste and scrap of paperboard; paper and paperboard and articles thereof;
- XI Textiles and textile articles;
- XII Footwear, headgear, umbrellas, sun umbrellas, walking-sticks, seat-sticks, whips, riding-crops and parts thereof; prepared feathers and articles made therewith; artificial flowers; articles of human hair;
  
- XIII Articles of stone, plaster, cement, asbestos, mica or similar materials; ceramic products; glass and glassware;
- XIV Natural or cultured pearls, precious and semi-precious stones, precious metals, metals clad with precious metal and articles thereof; imitation jewelry; coin;
- XV Base metals and articles of base metal;
- XVI Machinery and mechanical appliances; electrical equipment; parts thereof; sound recorders and reproducers, and part and accessories of such articles;
- XVII Vehicles, aircraft, vessels and associated transport equipment;
- XVIII Optical, photographic, cinematographic, measuring, checking, precision, medical or surgical instruments and apparatus; clocks and watches; musical instruments; parts and accessories thereof;
- XIX Arms and ammunition; parts and accessories thereof;
- XX Miscellaneous manufactured articles;
- XXI Work of art.
