1/ Increase in assets and decrease in liabilities are recorded with sign minus, whereas decrease in assets and increase in liabilities are recorded with the sign plus.

2/ The asset side of portfolio investments includes resident transactions in securities issued by non-residents, whereas the liabilities side records the opposite.

3/ Since Kosovo use Euro currency as a legal tender, this is considered as a foreign asset and in this sense Cash held by the CBAK is considered as investment in abroad. The same is applicable to ODC.

## 4. EXPLANATORY NOTES

## TABLES 2-12: FINANCIAL SURVEY AND BALANCE SHEETS FOR THE FINANCIAL SECTOR

The *financial surveys*, inspired on the IMF Manual on Monetary and Financial Statistics, are a subset of the financial accounts in the SNA 1993 and are based mainly on *balance sheets*, which are also published.

**Sources:**

CBAK: Accounting system; *Other depository corporations* (these are commercial banks): monthly Statistical Bank Report (SBR) based on CBAK Amended Rule XI on Reports by the banks (Form Nr. 11); *Insurance companies*: Aggregated data from reporting scheme to the Insurance Supervision Department of CBAK; *Pension Funds and Other financial institutions*: aggregated data from reporting to the Pension Supervision Department and Banking Supervision Department of CBAK.

**Classifications:**

*Institutional sectors (SNA 1993 compatible)*. The economy is composed of economic units, which may be defined as economic entities that are capable, in their own right, of owning assets, incurring liabilities and engaging in economic activities and in transactions with other entities. The institutional sectors group similar kinds of institutional units. CBAK has used the scheme presented below.

The **financial corporations** sector consists of all resident corporations or quasi corporations principally engaged in financial intermediation or in auxiliary financial activities, which are closely related to financial intermediation.

Central Banking Authority of Kosovo (CBAK) complies not entirely with the definition of a monetary authority, as it issues no banknotes. In the financial surveys the "CBAK" is mentioned instead of 'central bank'.

*Other depository corporations (ODC)*: In Kosovo these are the commercial banks licensed in Kosovo.

May 2008

*Other financial intermediaries (OFI)* consist of all resident corporations engaged in financial intermediation except depository corporations, insurance corporations and pension funds (cf infra). In the financial surveys on Kosovo, this sub sector is composed entirely by the 'Micro Finance Institutions' and the 'Other non bank

financial institutions'. These financial institutions are engaged in lending to small scale business and individuals, mainly in rural areas and the funding is provided mainly by donors.

*Insurance companies (IC)* consist of incorporated, mutual and other entities whose principal function is to provide life, accident, sickness, fire or other forms of insurance to individual institutional units or groups of units.

*Pension funds (PF)* are established for purposes of providing benefits on retirement for specific groups of employees and consist of:

- *Individual Savings Pension managed by KPST complemented with additional voluntary contributions paid by the employer or the employee, or both;*  
 Supplementary Employers Pensions, provided to employees by their employer;  
 Supplementary Individual Pensions, provided to natural persons from licensed pension provider.

*Financial auxiliaries.* In Kosovo this sub sector comprise the exchange offices and money transfer services. As their contribution to the outstanding amounts of deposits with the other financial institutions in Kosovo is limited, their position is, in contrast to the financial sub sectors mentioned before, not presented separately in the final surveys.

*Remarks:* Due to the lack of an operational enterprise register, the reporting agents do allocate the unincorporated business to the sector of the non financial corporations. This leads to a blurred distinction between households and non financial corporations in the statistics. *Non-profit institutions serving households (NPISH)* comprise religious societies and social, cultural, recreational and sports clubs, charities, relief and aid organizations financed by voluntary transfers in cash or in kind from other institutional units.

#### *Financial instruments (SNA 1993 compatible)*

The SNA 1993 classifies also financial instruments into groups of instruments with similar characteristics. The most important in the current context are briefly described.

Currency and deposits consist of *Currency* comprises those notes and coins in circulation; *Transferable deposits* comprise all deposits that are exchangeable on demand at par, , freely transferable by check; *Other deposits* include all claims, other than transferable deposits, on the central bank, other depository institutions. Typical forms of deposits are non transferable savings deposits and term deposits. Within the framework of the definition of money aggregates a further distinction according the original maturity has been made.

*Securities other than shares* include bills, bonds, certificates of deposit, commercial paper traded in the financial markets. These kind of financial assets do not yet appear on the liability side of the financial sector in Kosovo.

Loans include all financial assets that are created when creditors lend funds directly to debtors and evidenced by non negotiable documents.

*Shares and other equity* comprise all instruments and records acknowledging, after the claims of all creditors have been met, claims to the residual value of corporations.

*Insurance technical reserves* are subdivided in *Net equity of households in life insurance reserves and pension funds*. Life insurance reserves are considered assets of the insured persons or households and pension funds consist

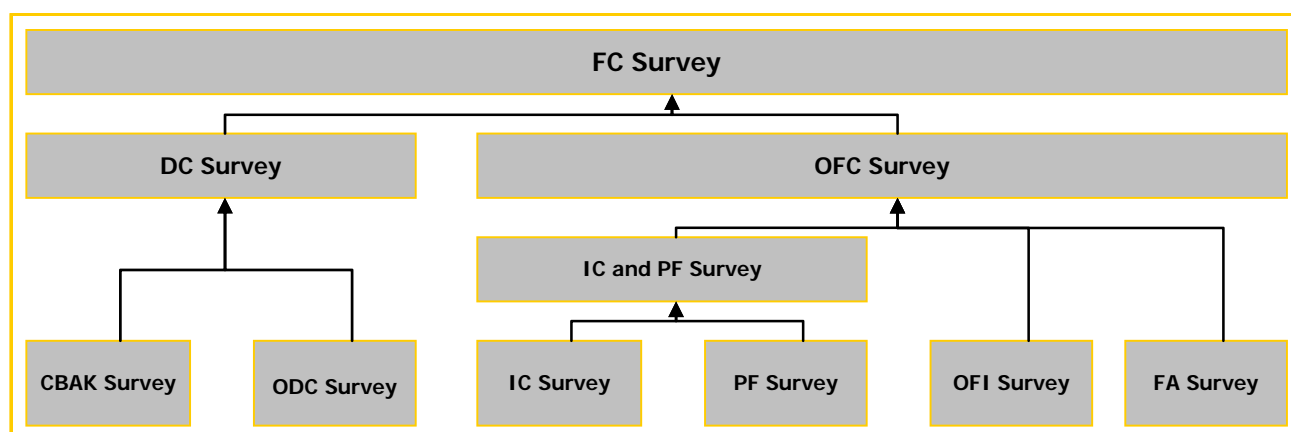

of the reserves held by funds established by employers and/or employees to provide pensions for employees after retirement; *Prepayments of premiums and reserves against outstanding claims*. Insurance premiums are due to be paid at the start of the period covered by the insurance, and this period does not normally coincide with the accounting period itself. Therefore parts of the insurance premiums payable during the accounting period are intended to cover risks in the subsequent period;

*Reserves against outstanding claims* are reserves that insurance enterprises hold in order to cover the amounts they expect to pay out in respect of claims that are not yet settled or claims that may be disputed.

*Other accounts receivable/payable*, mainly consist of accounts receivable and payable, other than those described previously value of corporations.

**Definition(s) and methodological notes:**

The bilateral positions of the individual institutions are netted out and subsequently the bilateral positions between the sub sectors at different stages are netted out leading to a *consolidated position* of the entities considered. This differs substantially from a simple aggregation. The consolidation is complete as far as it concerns the traditional financial instruments. The data available do not permit for an adequate consolidation of the accruals and most of the other payables/receivables for which the data reported by individual financial institutions does not contain a breakdown of the counterparts by institutional sub sector. For the consolidation the following sequence is applied.

- FC Financial corporations;  
 DC Depository corporations;  
 CBAK Central banking authority of Kosovo;  
 ODC Other depository corporations;  
 OFC Other financial corporations;  
 IC Insurance companies;  
 PF Pension funds;  
 OFI Other financial intermediaries;  
 FA Financial auxiliaries.

The surveys of the sector and the sub sectors are presented according to a common framework:

|   |
|---|
| Net foreign assets (+/-)<br>Claims by instrument<br>Liabilities by instrument<br><b>Domestic claims</b><br>Net claims on government sector<br>Claims on other sub sectors<br>Instrument<br>Counterpart (institutional sector) |

May 2008

**Domestic liabilities**  
 Claims on other sub sectors  
     Instrument  
         Counterpart (institutional sector)  
**Shares and other equity**  
**Other items (+/-), including consolidation adjustment**

The *counterpart* is defined as the institutional sector on which the holder of an instrument has a claim. In case of a term deposit by a non financial corporation with a commercial bank, the corporation has a claim on the commercial bank. In case of a security, the holder has a claim on the issuer of the security (for instance a corporation who issued shares), regardless from whom it was bought. Along the same lines of reasoning, a holder of a currency note has a claim on the issuer, namely a central bank. In the special case of Kosovo, this implies that holders of euro currency notes do have a foreign claim and enters in the foreign assets.

The *residency* criteria set forward by the SNA 1993 can not be followed in all details, as the residency /non residency dichotomy is mainly based on address information in the files of the reporting institution. The country indicated in those files does not necessarily correspond with the country where the client has its main center of economic interest.

The *valuation* of the financial instruments follows the market value for securities and the nominal value for deposits and loan, which are not adjusted for possible provisions made by the creditor. The financial instruments in foreign currencies, other than euro, are converted against the euro exchange rate prevailing at the end of the reporting period.

The surveys on CBAK, “Other depository corporations” and ‘Depository corporations’ are established at monthly *frequency*, while those on “Other financial intermediaries”, “Insurance companies”, “Pension funds” and “Financial corporations” are available at a quarter frequency. The data published are not adjusted for eventual seasonal effects.

*Remarks: The data on the Supplementary Individual Savings Pension schemes managed by KPST are not yet made available by KPST. The data structure on Other Financial Institutions is based on their annual accounts structure.*

#### TABLE 17: EFFECTIVE INTEREST RATES APPLIED BY COMMERCIAL BANKS

**Source:** Monthly report ‘Interest Rate Report’ of commercial banks licensed in Kosovo to CBAK.

**Definitions and nature of the data collected:** The main features are listed below:

|                           |  |
|---------------------------|--|

| 5. Counterparts           | All domestic non financial corporations; |

|                             |  |
|-----------------------------|--|
|                             | All domestic households  |
| 6. Reported contracts       | New business during the reference month / outstanding amount (depending on the type of financial instrument, cf. infra)  |
| 7. Type of interest rates   | Annual interest rate not including any fees nor commissions  |
| 8. Method of calculation    | Annual agreed rate or Actuarial rate (depending on features of the specific contract, cf. infra)   |
| 9. Reported rate and volume | <p>- One interest rate by category averaged with the weights of the new business of the reference month or outstanding amounts (depending on the type of financial instrument cf. infra) and; the total new business volume or outstanding amounts (depending on the type of financial instrument cf. infra).</p> <p>A category is defined by 5 variables and forms the combination of:</p> <ul style="list-style-type: none"> <li>the type of financial instrument;</li> <li>the sector allocation of the counterpart;</li> <li>the maturity band and;</li> <li>the range of amount involved;</li> <li>the purpose of financing in the case of loans</li> </ul> |

The annual rate to be reported by the commercial banks is the annual agreed rate (AAgR) or the annual actuarial rate (AAcR).

The *Annual Agreed Rate* (AAgR) is to be reported in all cases where there is no capitalization or the capitalization follows a regular pattern or the interest is charged on the remaining outstanding capital and no grace periods for interest payments or capital redemption are granted.

In all other cases the *Annual Actuarial Rate* (AAcR) has to be reported. This is the annual interest rate equaling the discounted (actualized) future cash inflows to the nominal amount of the loan or deposit.

The interest rate communicated by the commercial banks takes account of the interest rate on all individual transactions during the reference period, with 3 three exceptions : for saving deposits, current accounts and overdrafts, the interest is calculated by the bank as:

- the interest rate on each outstanding contract at the end of the reference month, weighted with the outstanding amount of the contract at the end of the reference period, or;
- the cumulative interest flows (accrued interest) over the month divided by the average of the daily outstanding amounts.

**IRR statistics:** A weighted interest rates communicated by banks are calculated. The market share of each bank having a new business during the reference month in the particular product serves as the weight.

The criteria set for the interest rates to be published are:

1. Minimum three observations for each product;
2. The standardized variance calculated for each product, as a measure of the dispersion among the observed interest rates, should not exceed 0.60 for deposits and loans;
3. If the second criterion is not fulfilled, then the market share for the observation which is an outlier should not exceed 0.33.

**TABLE 19: CBAK INTERBANK CLEARING SYSTEM**

The Interbank Clearing System (ICS) is established, regulated and managed by the CBAK. It started with operation in May 2001. The ICS is an electronic clearing and settlement service for payment orders among banks and the CBAK, and with the CBAK as an agent of the PISG (Ministry of Finance and Economy) of Kosovo. It offers end of day net settlement on accounts at the CBAK for single orders and/or bulk paper listings of multiple orders such as mass salary payments. The service permits the exchange of electronic data delivered via telephone lines to the CBAK electronic clearinghouse. Currently there are seven commercial banks participating at the ICS, and CBAK itself, which acts as a fiscal agent for the Ministry of Finance and Economy. ICS operates based on Operating Rules for Electronic Interbank Clearing and Settlement Service (EICS) of the CBAK.

**TABLE 20: INTERNATIONAL MONEY TRANSFERS AMONG FINANCIAL CORPORATIONS**

**OUTGOING:** The movement of money from account of bank or other financial corporation within Kosovo to the account in bank or other financial corporation accounts outside Kosovo.

**INCOMING:** The movement of money from an nonresident bank or other financial corporation account in the bank or financial corporation account within Kosovo.

**WIRE TRANSFERS AGENCIES:** All non bank financial institutions performing electronic or wire transfer services (Union Financiar Prishtina, Western Union PCB, Western Union RZB, Monedha, K.L.M. Enterprises, D.M.TH. Money Gram).

**TABLE 25: KOSOVO CONSOLIDATED BUDGET**

**PAYMENTS TO HOUSEHOLDS:** Starting from 2002, payments to households are included within subsidies and transfers.

**RESERVES:** Reserves include amounts authorized for contingent expenditures that may be used only for urgent and unforeseen requirements.

**TABLES 28-35: BOP METHODOLOGICAL NOTES**

The Central Banking Authority of Kosovo (CBAK) is responsible for compiling the Balance of Payments Statistics for Kosovo. The legal basis for collecting and compiling BOP statistics rely on the UNMIK Regulation 2006/47 on Central Banking Authority of Kosovo. The main data sources for compiling BOP are commercial banks (through International Transaction Reporting System), Statistical Office of Kosovo (balance of trade statistics) and Enterprise Surveys. Data are supplemented with information received from other sources as well as own estimates. The compilation of BOP is made in accordance with the IMF Balance of Payments Manual, fifth edition (BPM5). The BOP statistics are published in several CBAK publications such as: CBAK annual report, CBAK Bulletin and CBAK Monthly Statistics Bulletin, and are updated accordingly.

Balance of payments is one of the key economic statistical information that systematically summarizes, for a specific period of time, the economic transactions of Kosovo residents with the rest of the world. Economic transactions are inward transactions (receipts) and outward transactions (payments). Receipts from the rest of the world are recorded in the credit side and include economic transactions such as exports of goods, exports of services, income flows, financial flows and transfers, which are offsetting entries to any one sided transactions. Conversely, payments by domestic citizens to the rest of the world (non residents) are recorded

in the debit side and include economic transactions such as imports of goods, import of services, income flows, financial flows and transfers.

Conceptually, an economic transaction has two sides: something of economic value is provided and something of equal value is received through the double entry recording system. When an economic value is provided (e.g. Kosovo exports) a credit entry is made, and when an economic value is received (e.g. Kosovo imports) a debit entry is made. Where something of economic value is provided without something of economic value in exchange the double entry system requires an offset to be imputed (a transfer entry) of equivalent value. For example, food imported as aid requires a debit entry for the goods item and a credit transfer as offset. The example below illustrates how the double entry system is applied. By definition, under the double entry system credit entries must equal debit entries.

| Credit entries  | Debit entries   |
|---|---|
| Changes in all economic resources provided by Kosovans to non residents, including: | Changes in all economic resources received by Kosovans from non residents, including: |
| Exports of goods and services   | Imports of goods and services   |
| Income receivable   | Income payable  |
| Transfers which are offsets to debit entries  | Transfers which are offsets to credit entries   |
| Increase in financial liabilities of the Kosovo to non residents                    | Increase in financial claims of Kosovo on non residents                               |

**RESIDENCY CRITERIA.** Residents of Kosovo are legal entities registered and operating in Kosovo and natural persons whose domiciles (households) are located in Kosovo and who do not leave Kosovo for a period exceeding one year (except students and medical patients). Due to its specificity, special emphasis has been put on the treatment of UNMIK, KFOR, and other international staff in Kosovo.

- 1) **Treatment of UNMIK.** Based on the residency criteria as stated in the balance of payments manual (BOP5, paragraph 88), UNMIK is an international organization and, therefore, fulfills conditions to be classified as a nonresident of Kosovo. In this case, distinction should be made between the UNMIK as institution as well as UNMIK staff:
  - a. UNMIK as an institution is treated as nonresident in balance of payments transactions;
  - b. UNMIK international staff residency is determined on the basis on the length of their stay in Kosovo:
    - i. UNMIK international staff with a contract for one year and more is treated as resident of Kosovo;
    - ii. UNMIK international staff with a contract of less than a year is treated nonresident of Kosovo.

Records in BOP are made based on the study conducted by the UNMIK European Union Pillar "UNMIK's Impact on the Kosovo Economy" published in July 2006. Based on this publication, data for 2006 are forecasted. We updated data through actual figures based on the information provided directly from UNMIK to the CBAK.

The assumptions and estimates related to transactions of UNMIK as institutions and the staff is as follows:

May 2008

- a. Spending of UNMIK (as institution) for goods and services purchased from Kosovar companies are considered as exports of government services.
- b. UNMIK international staff that are considered as residents spend around 14% of their salaries in Kosovo. The remaining part of 76% are send in their home countries (remittances) and 10% is spend for traveling abroad (travel services).
- c. UNMIK international staff as nonresident (short term international staff of UNMIK) spend 14% of their salary in Kosovo for living allowance.

Through a hypothetical example we tried to show implication of UNMIK in Kosovo's BOP, based on our above mentioned assumptions:

Assuming that UNMIK budget is €100, of which:

|  |     |
|--|-----|
| — Wages to resident international staff    | 55  |
| — Wages to nonresident international staff | 3   |
| — Wages to local staff                     | 17  |
| — Staff assessment income (Tax paid to UN) | 5   |
| — Imported goods                           | 8   |
| — Local goods                              | 2   |
| — Imported services                        | 6   |
| — Local services                           | 4   |
| Total UNMIK's Budget                       | 100 |

By applying the previous example into the double entry system, records in BOP will be as follows:

|  | Credit | Debit |
|--|--------|-------|
| Current account  |        |       |
| Travel Services  |        |       |
| Short term staff spending for living allowance (14% of salaries) | 0.4    |       |
| Long term staff spending for traveling abroad (10% of salaries)  |        | 5.5   |
| Government services  |        |       |
| Spending of UNMIK (as institutions) for local goods and services | 6      |       |
| Compensation of employees  |        |       |
| Salaries of Short term staff                                     |        | 3     |
| Current transfers  |        |       |
| Total budget of UNMIK less imported goods & services             | 85     |       |
| Remittances (76% are send to their relatives abroad)             |        | 41.8  |
| Tax paid to UN for resident staff (around 8.1% of Wages)         |        | 5.8   |

Due to the mentioned treatment of UNMIK, its expenses for import of goods and import of services are considered as nonresident–nonresident transactions and not recorded in BOP.

- 2) **Treatment of KFOR.** KFOR is a NATO led international force responsible for establishing a safe and secure environment in Kosovo. KFOR entered Kosovo on June 12, 1999 under a United Nations mandate, two days after the adoption of UN Security Council Resolution 1244. KFOR contingents are grouped into four multinational task forces and troops come from 35 NATO and non NATO nations. Under international standards, KFOR is a military contingent and, therefore, a nonresident of Kosovo;

- 3) **Treatment of International Staff in Kosovo (excluding UNMIK).** In accordance with the SNA 93 and the BPM5 the international staff in Kosovo engaged in technical assistance or other activities on behalf of the Kosovo institutions is treated based on the length of their stay. The international staff of Foreign Liaison Offices and other offices of international organizations in Kosovo (diplomats, military personnel, and other employees of such organizations and their family members, who reside in Kosovo and enjoy immunity and diplomatic privileges) are treated as nonresidents of Kosovo.

**CURRENT ACCOUNT.** The Current Account comprises the acquisition and provision of goods and services, income, and current transfers between the country and the rest of the world.

- 1) **Goods.** The source of the data on international trade statistics is UNMIK customs service, processed by the SOK. The CBAK receives on a monthly basis the data on international trade statistics from the SOK, based on the SLA between the two institutions. CBAK makes adjustment for coverage and classification based on the supplementary information from other sources. Adjustments for coverage are made in the credit side for electricity, based on enterprise survey with KEK and for import of goods as donation provided from MEF for the year 2004 that were not included in SOK statistics. Adjustments for classification are made to value exports and imports in f.o.b. basis. The data on imports of goods are adjusted by application of c.i.f. / f.o.b. ratio of 6.5% (5% for transportation and 1.5% for insurance), excluding imports from neighboring countries which are valued at f.o.b. basis. Estimates are done by analyzing the value of c.i.f. to total value of imports of goods for a specific period, based on the information from SAD;
- 2) **Services.** Trade in services covers the provision of services by residents to non residents and vice versa. The services component of the BOP consists of: transportation, travel, government services (not included elsewhere) and other services, which are subdivided into further items (communication, construction, insurance, financial, computer and information, royalties and license fees, other business services, personal services and government services);
- a. *Transportation.* Covers sea, air and other (i.e. rail, land and pipeline) transport. It includes the movement of passengers and freight and other related transport services, such as chartering of aircraft with crew, cargo handling, storage and warehousing, towing, pilotage and navigation, maintenance and cleaning, and commission and agents' fees associated with passenger/freight transportation. The passenger transport is estimated based on the number of average passenger air fares travelling through Prishtina Airport multiplied with the average cost of one ticket. The data on passenger transportation are retrieved from the Prishtina Airport. The value of freight transport services is estimated on the basis of difference between the value of imported goods at c.i.f. and f.o.b. values (debit side). The source of data is the information provided from Prishtina Airport. The ratio of freight transport to the total amount of c.i.f. imports is considered to be 5%. Imports from neighboring countries are considered to be in f.o.b. basis. Receipts for commission and agent fees for transport related services as well airport landing fees are recorded in credit side;
- b. *Travel services.* Cover services provided to non residents during trips in Kosovo (credit), and provided to Kosovo residents during similar trips abroad (debit). The exceptions are those military and diplomatic personnel (i.e. KFOR and Liaison Offices), whose expenditure are recorded under government services.
- c. *Business travel.* Covers all type of business activities such as carrier crews stopping off or lying over; government employees on official travel; employees of international organizations on official business (e.g. technical assistance); and employees doing work for enterprises that are not resident in the economies in which the work occurs. Business travel is estimated based on the data from enterprise surveys and data from ITRS.
- Personal travel includes all travelers going abroad (coming in Kosovo) other than business travel. This includes also expenses for accommodation of UNMIK short term staff in Kosovo (in credit

May 2008

side) and spending for travel abroad of UNMIK long term staff considered as residents of Kosovo (in debit side). It is assumed that the short term international staff spends around 14% of their salaries in Kosovo for commodities. This estimate is done based on the study conducted by Economic Policy Office of UNMIK's Pillar 4. Another important source of information for personal travel is derived from Household Budget Survey regarding consumption by Kosovar diaspora during their visits in Kosovo. The expenditure of Kosovars going for vacation is done by combining the information from central banks in the region (Bank of Albania and Central Bank of Montenegro), as well as ITRS data.

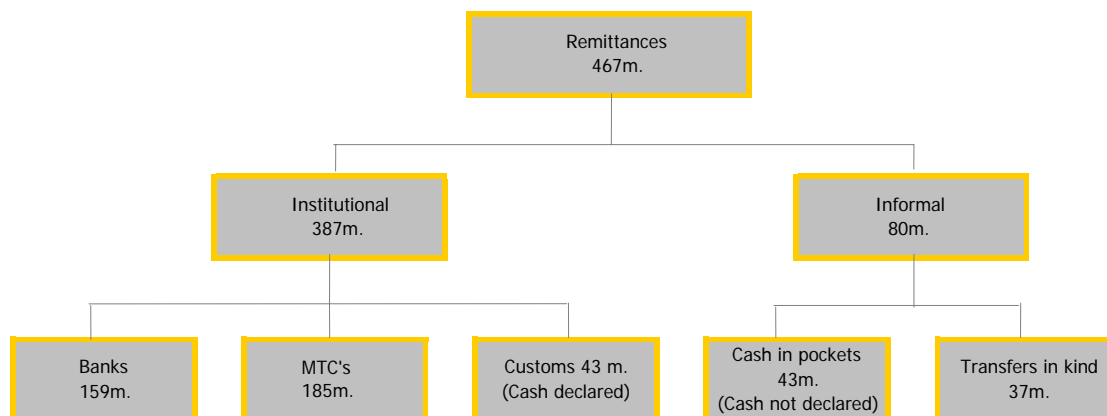

- d. *Government services (not included elsewhere)*. Is a residual category covering government service transactions (including those of international organizations) not contained in the previous classifications. Government services include also all transactions by liaison offices, and export of goods and services to KFOR. Sources of the data are different such as ITRS, Liaison Offices, municipalities, etc.
  - e. *Other services*. Under this category are included exports and imports of communication services, construction services, insurance services, financial services, royalties and license fees, personal, cultural and recreational services and other business services. Source of data are enterprise surveys and ITRS.
- 3) **Income**. The income component relates to income earned from two factors of production: labor and capital. Consequently, the income consists of compensation of employees and investment income:
- a. *Compensation of employees*. Covers wages, salaries and other benefits paid to non resident workers in the country, or received by resident workers abroad. In this context, includes seasonal or other short term workers (less than one year) and border workers who have centers of economic interest in their own economies. Compensation of employees paid to Kosovans working for international organizations, and KFOR are recorded under credit side (excluding local employees working for UNMIK which are recorded under current transfers). In the debit side are recorded salaries of UNMIK international employees with a contract for less than one year, and which are treated as a nonresident, since the amount is previously recorded under current transfers. The compensation of employees is calculated based on various sources of information including data collected directly from UNMIK, KFOR, MEF, Liaison Offices, and from other international organizations;
  - b. *Investment income*. Covers receipts and payments of income associated with external financial assets and liabilities. The main component of investment income represents income from direct investments, portfolio and other investments. The most typical form of income from abroad is interest earned from deposits or securities with foreign banks. In the debit side are included payments to direct investors in Kosovo like dividends, reinvested earnings, interest paid for loans borrowed from abroad, etc. The main sources of information on the investment income are reports of commercial banks, insurance companies and the CBAK;
- 4) **Transfers**. Transfers are offsetting entries for real resources or financial items provided without receiving in return any good, service, or financial item. Transfers are separately identified as either current or capital transfers;
- a. *Capital transfers* consist of transfers (1) involving ownership of fixed assets, (2) transfers of funds linked to, or conditional upon, acquisition or disposal of fixed assets, or (3) cancellation of liabilities by creditors without any counterparts being received in return.
  - b. *Current transfers* are sub divided into those of central government and other sectors;
    - i. General government includes:
      - (1) Grants to the Kosovo Consolidated Budget (Donor Designated Grants)
      - (2) Donor aid, in kind (Public Investment Program)
      - (3) Direct spending of the UNMIK and its pillars.
    - ii. Other sectors – whose current transfers are further divided into:
      - (4) Worker remittances (mainly migrants transfers); and

(5) Other transfers – include insurance premiums and claims, pensions, some grants related to different institutions.

The main data sources for the estimate of current transfers are UNMIK, MEF (donor coordination unit), ITRS, and Household Budget Survey (conducted from the SOK).

*Worker remittances.* Cover current transfers by migrants who are employed in other economies and considered residents there. A migrant is a person who comes to an economy and stays for a year or more. Persons who stay in new economies for less than a year are considered nonresidents; their transactions are appropriate mainly to the component for compensation of employees (BPM5, paragraph 269 through 272).

*Estimate of inflows from Kosovo migrants living abroad* - The estimate of incoming remittances is done based on main channels of the flows. A variety of data sources is used to measure income flow. We focused mainly to identify registered flows coming through official channels (banks, MTCs and money declared at the Customs Authorities) and remittances coming through informal channels (not declared, such as cash that pass through customs, non cash transactions like goods transferred from migrants living abroad (see scheme below).

*Estimate of outflows of resident foreigners.* In debit side of remittances, the estimate includes remittances related to (1) international staff long term working for UNMIK and (2) other international staff engaged in other projects (i.e. PIP). It is estimated that resident foreigner's sends 76% of their salaries to their relatives. Data source in debit side are the budget of UNMIK and RIMS database of the Ministry of Economy and Finance for Official Development Aid spend in Kosovo.

*Other Donor Assistance (ODA) to the government.* Technical assistance is ongoing support of the international community to strengthen the institutional aspect of the Provisional Institutions of Self Government (e.g. revenue collection, investment in physical and human capital, etc.). ODA to Kosovo has been mainly committed and disbursed through the following types of intervention: capital investment, technical assistance, supply of equipment, credit (investments in infrastructure), training and other. Records in BOP are made based on the study conducted by the Donor Coordination Center. The main assumptions and estimates related to ODA transactions and the staff are as follows:

1. 67 percent of wages are dedicated to international staff. All international staff are residents of Kosovo and they spend around 14% of their wages in Kosovo. The remaining part of 76% are send in their home countries (remittances) and 10% is spend for traveling abroad (travel services).
2. Wages to local staff are 13 percent from total wages.
3. From total goods and services 91.5% are imported goods.

**CAPITAL ACCOUNT.** Under *capital account* are included some investments in construction made by KFOR and migrant transfers. The main source of information for migrants' transfers is ITRS.

**FINANCIAL ACCOUNT.** Covers transactions in foreign financial assets (claims on nonresidents) and foreign financial liabilities (liabilities to nonresidents). The four categories (direct investment, portfolio investment, other investment and reserve assets) are based primarily on the relationship between the parties, and secondly on the nature of the instrument involved.

1. **Direct investments** - is a category of international investment that, based on the equity ownership of at least 10%, reflecting a lasting interest by resident in one economy (the direct investor) in the resident enterprise in another economy (the direct investment enterprise). Using this criterion, a direct investment relationship can exist between a number of affiliated enterprises, whether the linkage involves a single chain or a number of chains. The components of direct investment transactions are:
  - a. **Equity capital** comprises investment in branches, shares in subsidiaries and associates (except non participating preferred shares that are treated as debt securities), and other capital contributions;
  - b. **Reinvested earnings** consist of the off setting entry to the corresponding current account income item: it is the direct investor's share of the undistributed earnings of its branches, subsidiaries and associates;
  - c. **Other capital** covers all other inter affiliate financial transactions (borrowing and lending of funds), including debt securities and trade credit.

Following the recommendations of the IMF, ECB, Eurostat and OECD, direct investment flows are recorded on a directional basis (rather than the more usual assets/liabilities basis): direct investment abroad – as an asset, and direct investment in the reporting country – as a liability. Direct investment abroad covers net investment by parent companies resident in Kosovo in their foreign branches, subsidiaries and associated companies. Direct investment in Kosovo covers the net investment by foreign companies in their affiliates located in Kosovo. The CBAK uses different sources of information for the calculation of FDI. The main sources of information for the estimate of FDI in Kosovo are Kosovo Trust Agency (KTA), commercial banks reports to CBAK, and ITRS.

2. **Portfolio investment** covers the acquisition and disposal of equity and debt securities, which cannot be classified under direct investment or reserve assets transactions. The securities involved are traded (or tradable) in organized and other financial markets. Debt securities cover bonds and notes, which have an original maturity term of more than one year, and money market instruments with original maturity of one year or less. Data on debt securities in the case of Kosovo includes investments in securities abroad from CBAK and commercial banks. The main sources of information on portfolio investment are the data provided by the CBAK, and commercial banks operating in Kosovo.
3. **Other investment** - covers assets and liabilities other than those classifiable to direct investment, portfolio investment or reserve assets. It comprises short and long term loans, currency and deposits, trade credits

and other assets and liabilities. Short term trade credits comprise the advance payment by nonresidents for the future exports (on the liability side) and expected post payments from nonresidents for exports (on the asset side). The estimate of trade credits is done by using the ratio of those two categories to total imports and exports reported in ITRS. Information about currency and deposits, loans and other assets are obtained from balance sheet of commercial banks, balance sheet of CBAK, MEF (government deposits abroad), balance sheet of other financial institutions, ITRS (deposits and loans of non financial entities with abroad) and enterprise surveys (other accounts payable/receivable).

4. **Reserve assets** - consist of those external assets that are readily available to, and controlled by, monetary authorities for direct financing of payments imbalances, for indirectly regulating the magnitude of such imbalance through intervention in exchange markets to affect the currency exchange rate and/or for other purposes (BPM5, p. 424). Reserve assets consist of: Monetary gold, Special Drawing Rights, Reserve position in the Fund, foreign exchange (currency and deposits, and securities), other claims.
  - a. *Other foreign currency assets* refer to foreign assets of the monetary authorities that are not included in reserve assets, but as reserve assets, must be liquid foreign currency assets that meet the criteria of being available for use by the authorities in the time of a crisis. Following the reserve assets definition only two components of the CBAK foreign assets and liabilities meet the main characteristics of reserve assets (to be readily available and to be controlled by the CBAK): Euro in cash and reserve deposits of banks with CBAK. Consequently these components are classified in BOP as reserve assets. Data sources are obtained from balance sheet of the CBAK.

**NET ERRORS AND OMISSIONS.** The sum of the credit entries should in principle equal the sum of the debit entries over the period. In practice, because some transactions may not be captured or because of differences in coverage, valuation and timing of transactions, exact symmetry does not occur and the balancing item *net errors and omissions* is inserted to balance the overall account. Ideally, the scale of this item should be relatively small in relation to the combined value of all credit and debit transactions expressed in absolute terms.
