	Fiscal Sector - Budget expenditure by economic activity	32
	Foreign Trade	33
	EXPLANATORY NOTES	

MAIN CHARACTERISTICS OF THE OTHER DEPOSITORY CORPORATIONS (000 EUR)

- ▶ The trend of deposits at the commercial banks (ODC) crossed slightly its peak, reached at the end of 2001 boosted by the EURO conversion.
- ▶ The commercial bank credit to the private sector is growing rapidly. The outstanding amount of credit has doubled compared to the level of end 2002. Moreover, the gap between the money re-invested abroad and that re-invested in the domestic economy became narrower, reflecting the growing confidence of the banking system.
- ▶ Total assets of commercial banks reached EURO 547 million, a growth of 16% compared to the level of end 2002.

MONETARY AGGREGATES ('000 EUR)

- ▶ The monetary aggregate M0 is characterized by a decreasing trend due to the dominance of the export of cash over its import. This can be considered as a positive trend for the Kosovo economy which is still an economy highly based on cash payments.
- ▶ Since end 2002, the monetary aggregate M1 follows a similar trend as M0, despite the growth in current accounts which are outperformed by the observed decrease of cash in circulation.
- ▶ The trend of M2 which is considered as an appropriate definition of broad money, shows a slighter decrease than M1, as saving deposits grew at a faster pace than current accounts.

CONTRIBUTION TO THE GROWTH RATE OF PRIVATE SECTOR DEP. (percentage points)

- ▶ The monthly growth rate of the deposits of the private non financial sector has been around 4% during each of the 3 most recent months.
- ▶ The contribution to this growth of total deposits stems mainly from the term and savings account held by individuals, followed by the current accounts held by enterprises. Individuals and enterprises, had each a comparable contribution over the last three months.

FISCAL SECTOR: GENERAL BUDGET REVENUE, stock data, million EUR.

Period	TOTAL	Tax revenues		Non taxes revenues	Donor grants		Interest	
		Border taxes	Domestic taxes		Budget support Grants	Designated Grants	Banks abroad	BPK
		1 to 7	1	2	3	4	5	6
2000	289.54	115.17	6.55	5.80	120.75	40.13	1.14	0.00
2001	355.89	208.74	41.00	20.74	41.10	42.34	1.97	0.00
2002	508.37	359.48	74.63	31.68	18.10	20.83	1.49	2.16
Sep-03	460.98	321.58	81.91	32.13	2.24	20.67	0.29	2.16

Source: Ministry of Finance and Economy - Department of Economic Policy

▶ General budget revenue developments are in line with the projections for year 2003 (total projection: 491.9 million EUR), and if trend continues this may even lead to a surplus.

▶ Despite this positive development one should emphasise that the structure of the revenues remain almost the same as in the previous year. The main source of budget revenues are tax revenues collected at the border (69.7%).

FOREIGN TRADE AND DONORS, million EUR

Source: Ministry of Finance and Economy.

▶ Kosovo economy continues to run a huge trade deficit. The coverage of its imports of goods by its exports of goods remains at a very low level (only 3.3% at the end of August 2003).

▶ The highest part, expressed in value, of regular exports is shared by metals and scrap, counting for 34 %. The share of plastics and wood was 23%, while the share of food amounted at 19.8% of the regular exports. The highest share in imports of goods, also expressed in value, are food with a share of 35.4%. The share of other commodity groups shows the following ranking: chemicals and wood (15.2%), petrol (13.3%), machinery (12.1%), construction materials (7.0%), metals (6.9%), textile (1.9%), and other (7.6%).

▶ Based on imports by the place of loading, the main trading partners of Kosovo after the European Union, are Serbia, Macedonia, Turkey and Bulgaria.

CONSUMER PRICE INFLATION RATE

Data source: Statistical Office of Kosovo

▶ In September 2003, the Consumer Price Index increase with 0.4% compared to the corresponding month of the previous year.

▶ The annual inflation rate seems to stabilise over the last three months, but the intensity of price changes, measured by the monthly percentage changes, for the most recent months suggest a potential upward shift.

UNEMPLOYMENT

Period	Dec-00	Dec-01	Dec-02	Sep-03
TOTAL PERSONS	208.074	237.958	257.505	277,623
<i>of which female(%)</i>	43.2	44.1	44.5	45.2
Education(%)				
Elementary	58.1	60.4	61.5	62.8
Secondary	38.8	37.0	36.2	35.4
University	3.1	2.6	2.2	1.8

Source: Kosovo Employment Office (Percentages are expressed against the total number of unemployed)

► The estimated rate of unemployment in Kosovo varies between 50-60%

► There has been an increase of registered job seekers during the year 2003 with 20,117 persons or 7.8 % compare to the end of year 2002.

PRIVATIZATION PROCESS

Description	Number of SOEs privatized	Revenues from privatization (EU million)
1-st wave	5	2,335,875
2-nd wave	18	23,904,247
TOTAL	23	26,240,122

Source: Kosovo Trust Agency

► Privatization process has started successfully. After two waves of privatisation, 23 SOEs have been privatized, and the revenues from privatization reached €26 million.

MAIN INDICATORS (million EUR)

Description	Period	2000 (e)	2001 (e)	2002 (e)	2003 Projections
GDP		1,338	1,582	1,687	1,825
GDP per head		770	851	866	917
Workers remittances		550	600	700	728
Foreign assistance		1,212	1,084	772	721
Direct contribution of foreign assistance to GDP		373	398	203	188
Population (in thousands)		1,738	1,859	1,948	1,991
GNP per head (in Euros)		1,086	1,174	1,226	1,283

Source: IMF Staff estimations and projections.

► The GDP growth rate is still driven by three main factors: foreign assistance, worker remittances and imports.

MODIFICATIONS TO THE MONTHLY STATISTICS BULLETIN

1. Overview of the modifications

This issue of the Monthly Statistical Bulletin has undergone some substantial changes due to the inclusion of new information. As a consequence the structure of the Bulletin, the sequence and numbering of the tables have been adapted.

First of all, the Bulletin contains an overview of the key economic indicators for Kosovo.

Secondly, all information covering financial data is regrouped in Chapter 1 'Monetary and financial statistics'. This means that the information on insurance companies, micro-financial institutions and the exchange rate has been brought forward. The information in this part has been enlarged (see point on the monetary and financial statistics). All statistics related to non-financial or non-monetary issues do form part of the Chapter 2 'Other sectors statistics'.

Thirdly, the Bulletin is completed with some new indicators on the banking sector and foreign trade statistics.

The tables and figures on the monetary and financial statistics are documented with explanatory notes at the end of the Chapter 1. These notes contain information on the data, their coverage and their calculation and should be considered as a first step in an ongoing development of more elaborated metadata.

The layout of the tables and the graphs has been further harmonized, throughout all chapters of the Bulletin.

2. The key economic indicators for Kosovo

There is a huge need for a comprehensive view on the stance of the economy of Kosovo. A lot of work is underway at BPK and SOK to improve the coverage and quality of economic and financial statistics.

The table with the key economic indicators presented in the Bulletin makes a selection out of the data presently available in the field of the real and financial economy together with some structural indicators on Kosovo. The table will be updated monthly and enlarged upon availability of new variables.

3. The monetary and financial statistics

All statistics on monetary and financial matters are re-grouped into an extended Chapter 1 'Monetary and financial statistics' and is divided into monetary statistics, financial statistics, structural indicators and, finally, financial market information.

3.1. Monetary statistics

a. The monetary aggregates have been revised in three respects.

The monetary aggregates measures the holdings of money by residents, other than the banking sector (BPK and commercial banks) and the central government. The money consists of currency holdings, current accounts, term- and savings deposits.

At the present juncture, data are lacking to answer fully to the international standard. Therefore, the money holdings of the government other than the central government (which consist mainly of the ministries and government agencies having power to the whole territory of the economy and which are actually by far the most significant part of the government sector having financial assets which creates only a minor underestimation) and the financial sector other than the banking sector are not yet included in the monetary aggregates. Once the RSD of BPK will dispose of separate information on the deposit holdings of the other financial institutions, grace to the introduction of a new reporting scheme for commercial banks, all holdings of the other financial institutions –at BPK and at commercial banks- will be included in the monetary aggregates. The same will be hold for the government sector other than central government. It is expected to achieve this by the first quarter of 2004.

Notwithstanding these existing incompleteness, analysis of the available data sources made it possible to improve already now the quality of the figures on the monetary aggregates: the estimate on the cash holdings changed somewhat, the breakdowns of the current and time deposits with banks have been revised and improved, and the transferable accounts of a part of BPK-clients are taken into account. All leading to increases in the level of the monetary aggregates.

The stock of the cash holdings is mainly estimated on the basis of information which came available at the time of conversion of different currency-notes into Euro-notes and coins at the time of the introduction of the euro in 2001 and is since then continued on the basis of the shipments (export and import) of Euro –notes via the financial system. The method doesn't take account of the export and import of notes via other channels and may lead to an incorrect picture of the true cash holdings in the domestic economy. The new method leads to an increase, actually of slightly more than 50 million euro, in the level of cash holdings compared to the data previously published by BPK.

The banks do report in their monthly forms to the BPK the volume of deposits in process. It concerns deposits in transit from one account to another at the time the forms are established and reported to BPK. Over the recent months the volume of deposits in process fluctuates around 4 million euro. That amount is now considered to be part of the current deposits of residents and increases as a consequence the volume of broad money with that amount. Based on information provided by the commercial banks, the holdings of deposits by residents and non-residents have further been improved, leading to a reduction of the monetary aggregates, as these aggregates take only account of the holdings of the residents.

The transferable accounts at BPK held by the non-financial sector, other than central government, are in conformity with the international statistical recommendations now also included in the concept of broad money.

b. More detailed macro monetary information: the surveys

Data from the banking sector are re-scheduled into macro monetary information, called the monetary surveys, which provide synoptic views on the financial intermediation by the banking sector.

There are surveys for the BKP, the Other Depository Corporations-ODC (in Kosovo the sector of ODC coincides with the commercial banks)- and the consolidated position of BPK and ODC into the Depository Corporations (DC). BPK is publishing that kind of data since the reference year 2000 and several improvements have been implemented since the outset.

In the light of the recommendations of the International Monetary Fund, some further improvements have been introduced. It concerns mainly the dissemination of more details. In the future, these details will be completed with additional breakdowns based on the enhanced banking reports mentioned earlier. The presentation of the three types of monetary surveys has been reformatted to be coherent with the current situation of the monetary aggregate definitions

The monetary survey for the Depository Corporations has eliminated the currency in circulation as part of the foreign assets of the DC, and subsequently from those of the BPK.

The new presentation of the monetary survey for BPK provides furthermore a separate entry for that part of the current account of commercial banks held at BPK which helps constituting the mandatory minimum liquidity reserve of commercial banks.

The reformatted presentation of the monetary survey on ODC identifies better the foreign assets and liabilities, leaving us with less remaining data in the residual 'Other items (net)'. Deposits by nonresidents, the borrowings abroad and the subordinated debt financed by nonresidents are identified, as are the investment in foreign securities by commercial banks

The table 6 (previously table 7) 'Commercial bank deposits held by nonresidents' does not longer contain details on the resident holders as this information is now part of the monetary survey in table 4. The former table 6 has been renumbered to table 9 'Income statement of commercial banks'. The separate table on the cash in vault of the BPK has been suppressed as the information is presented in the balance sheet of BPK, which goes as table 3.

3.2. Financial statistics

The statistics on the activities of insurance companies have been enlarged in order to provide a complete coverage of their activities. The premiums and number of policies sold are available for all types of insurance activities. The claims paid for trans-border policies are completed and those for third party claims are completed with payments carried out by the Kosovo Guarantee Fund.

3.3. Structural indicators

The structural indicators on geographical representation, are completed with a measurement of the degree of competition in the commercial banking sector, by means of the Herfindahl index, and the employment figures in the whole banking sector.

3.4. Financial market information

That part contains information on the interest rates offered commercial banks on customer deposits and loans and on the euro exchange rate.

4. The other sectors statistics

The Chapter 2 'Other sectors statistics' has been reduced in terms of number of tables. The accent of the chapter is on the consumer price index, unemployment, the fiscal sector and foreign trade. The reproduction of the tables on the structural information on employment and number of enterprises will be temporarily suspended as the data are in the process of revision by the original compiler.

LIST OF ABBREVIATIONS:

BPK	Banking and Payments Authority of Kosovo;
COICOP	Classification of Individual Consumption by purpose;
DC	Depository Corporations;

EXPLANATORY NOTES

TABLES 1-5 : MONETARY SURVEY and BALANCE SHEETS OF THE DEPOSITORY CORPORATIONS

Source(s): Monthly reporting forms submitted by licensed commercial banks, which form the Other Depository Corporations (ODC), to the Banking and Payments Authority of Kosovo (BPK). The ODC and the BPK together do form the Depository Corporations (DC) in the classification of the Monetary and Financial Statistics Manual of the IMF.

Monthly data provided by the Accounting department of BPK. Monthly estimate of currency holdings based on information from BPK and commercial banks.

Classification(s): Institutional units are classified into sectors. The sector classification in the monetary and financial statistics is based on the SNA 1993.

The classification of the financial instruments is based on the SNA 1993 and MFSM 2000.

Definition(s):

Residency

The residency criteria in the books of the banks is based on the country in the address information given by the accountholder to the DC. This implies that persons who do not fulfill the SNA 93 criteria to be considered as residents – in principle having their main center of economic interest in the country concerned – may be counted as residents. The reverse situation may hold also.

In the monetary and financial statistics UNMIK-bodies are considered as domestic sector, except the UNMIK-entities which are solely working for the administrative part related to the UNO-administration. These are considered as nonresidents as are all liaison offices in Kosovo.

Monetary aggregates

As the BPK doesn't issue currency (de facto, the Euro is the main legal tender in Kosovo) the base money consists of deposits by commercial banks at BPK.

Broad money is a multi-currency concept containing cash holdings, current-, time- and savings accounts at commercial banks and BPK by resident entities other than the DC and the central government. The deposits in process (deposits in transit from one account to another at the time the reporting forms are established and reported to BPK) are included in the monetary aggregate. Due to lack of data, the deposits of the other financial institutions (OFI) with commercial banks are not part of broad money. To ensure an equal sector treatment, the deposits of OFI at BPK are neither considered as part of the monetary aggregates. This will change once the commercial banks fill out the new reporting scheme in which the details on OFI will become available. From then onwards, the money holdings of OFI will be included in the monetary aggregates. A similar situation applies actually for the government sector, where at the present juncture not only the central government money holdings are excluded from the monetary aggregates but also those belonging to the local government bodies.

Definitions of the Monetary Aggregates

M0 include:

↔ Currency in Circulation (e);

M1 includes:

↔ M0;
↔ Transferable Deposits in DC's (Sight Deposits);

M2 includes (also called **BROAD MONEY**):

↔ M1;
↔ Other Deposits in DC's (Terms and Saving Deposits);

Foreign and domestic assets/liabilities

The breakdown of assets (and liabilities) is a notion which showing the financial relationship between the domestic economy and the rest of the world. In case a country has more financial claims on the rest of the world, it is said to have net foreign assets. In the contrary situation the country has net foreign liabilities.

The definition of external is based on the first counterpart. This means that deposits in domestic or foreign currency by a resident at a domestic bank are domestic claims (or assets) of the deposit holder. These same deposits held at a bank outside the country are foreign claims for the deposit holder. The investment by a domestic resident in a share or bond issued by a domestic entity creates a domestic claim, while a similar investment in securities issued by a foreign entity constitutes foreign claims. Currency notes in hand or in vault do form a claim on the issuer of the currency notes (as it was the case in the previous example on bonds). If it concerns notes issued by a foreign central bank, for instance a national central bank of the Eurosystem, held by a resident, the holder has a foreign claim on that foreign central bank.

Compilation The cash holdings are mainly estimated on the basis of the volume of conversions into Euro-notes and coins at the time of the introduction of the euro in 2001 and since then continued on the basis of shipments (export and import) of Euro-notes via the financial system. The method doesn't take account of the export and import of notes via other channels and may lead to an incorrect picture of the true cash holdings in the domestic economy.

The deposits in process are allocated to current accounts of domestic households and current accounts of domestic enterprises according to their mutual importance.

Assets and liabilities in currencies other than Euro are converted against the Euro exchange rate prevailing at the end of month.

There is no seasonal adjustment calculation.

In principle the first publication is definitive. In case DC might revise their data, a new statistical series is published.

TABLES 10, 11 AND 12: BPK CASH OPERATIONS (BPK DEPOSITS, BPK WITHDRAWALS) BPK NON CASH OPERATION (BPK NET TRANSFERS)

BPK DEPOSITS:

This table presents the deposits in cash made by BPK customers at BPK during the period.

BPK WITHDRAWALS:

This table presents the withdrawals in cash made by BPK customers from BPK during the period.

BPK NET TRANSFERS:

This table presents the net transfers among BPK client accounts

In this three tables there are not included transaction dealing Incoming Payments, Interest on current accounts, International incoming transfer, International outgoing transfer, monthly maintenance, outgoing payments

TABLE 13: INTERBANK CLEARING SYSTEM

The Interbank Clearing System (ICS) is established, regulated and managed by the BPK. It started with operation in May 2001. The ICS is an electronic clearing and settlement service for payment orders among banks and the BPK, and with the BPK as an agent of the Central Fiscal Authority (Ministry of Finance and Economy) in Kosovo. It offers end of day net settlement on accounts at the BPK for single orders and/or bulk paper listings of multiple orders such as mass salary payments. The service permits the exchange of electronic data delivered via telephone lines to the BPK electronic clearinghouse. Currently there are seven commercial banks participating at the ICS, and BPK itself, which acts as a fiscal agent for the Ministry of Finance and Economy. ICS operates based on Operating Rules for Electronic Interbank Clearing and Settlement Service (EICS) of the BPK.

TABLE 14: FOREIGN TRANSFERS

OUTGOING: The movement of money from an account at a bank or other financial institution within Kosovo to an account at a bank or financial institution accounts outside of Kosovo.

INCOMING: The movement of money from a nonresident bank or other financial institutions account into a bank or financial institutions account within Kosovo.

WIRE TRANSFERS AGENCIES: All non-bank financial institutions performing electronic or wire transfer services (Western Union, Western Union MEB, ERA).

TABLE 24 AND 25: FISCAL SECTOR

PAYMENTS TO HOUSEHOLDS: starting from the year 2002 payments to households are included within subsidies and transfers.

RESERVE: Reserve includes the amounts authorized for contingent expenditures that may be used only for urgent and unforeseen requirements.

TABLES 26, 27 AND 28: FOREIGN TRADE (EXPORT AND IMPORT BY TRADING PARTNERS, EXPORTS BY COMMODITY GROUP, IMPORTS BY COMMODITY GROUP):

EXPORT AND IMPORT BY TRADING PARTNERS:

Trade balance is calculated using the Brico data. Trading partners are identified using the information on import of goods by place of loading.

EXPORTS BY COMMODITY GROUP:

Data for the third and fourth quarter of 2001 are incomplete. Export data do not include all unregistered export:

- exports of goods crossing the border at the following points: ICD Prishtina, ICD Gjakova, BPC Gllboçica, BPC Post (PTK) and Airport,
- electric power deliveries, and
- "internal" exports: goods and services sold to foreigners in Kosovo.

IMPORTS BY COMMODITY GROUP:

Column 1- 9: Imports as documented by the Brico system (foreign trade database by the Customs Services of Kosovo). The 2000 figures do not include shipments from/through Serbia, Currently, all Brico files are being extended and corrected by MFE.

- Column 2: Food and tobacco
- Column 3: Clothing – textile and footwear
- Column 4: Petrol and diesel
- Column 5: Chemicals, plastics, leather, limber, paper, and photocopy materials
- Column 6: Construction materials
- Column 7: Metal products; metals, including silver products
- Column 8: Machinery and equipments
- Column 9: Other – goods not classified in columns 2-8.

Column 10: The value of taxable commercial imports is derived from the border tax data according to the following formula: $[(\text{Sales Tax} / 0.15) - (\text{Customs} + \text{Excise})]$; since July 2001, the sales tax is replaced by VAT. Both the sales tax and VAT have been levied on all commercial imports.
